Industry 51
EAUN Industry Partners 55
Dear Colleagues,

It is with great pleasure that we welcome you to Copenhagen for the 19th International Meeting of the European Association of Urology Nurses (EAUN18). With the support and close collaboration of Danish urology nursing colleagues, EAUN18 promises to be a highly-informative, cutting-edge and interactive meeting.

You can expect a diverse range of topics that will examine key issues in urological nursing. Two collaborative EAUN-ESU (European School of Urology) courses will cover sexual dysfunction in men and women and immunotherapy in bladder cancer. The meeting’s Thematic Sessions will focus on important topics such as bone health, end-of-life care, cyber safety, shared decision-making and more. Its state-of-the-art lectures will address varied challenges in nursing practice; from how an adolescent patient’s brain works to men’s health and urostomas.

The not-to-be missed Video Session will take place on 18 March which will showcase the urology nursing practice and how to overcome situations in emerging clinical nursing practice. Share your ideas and suggestions during the Specialty Session Creating OUR Urology Nursing Curriculum – at the ‘no fairy-tale café’ an important theme which will spark a lot of discussion. You are also invited to participate in the Hands-on training Session with robotic simulation; the Leadership Course for nurses; and the Industry Session on difficult male catheterisation.

Catch up with friends and colleagues at the EAUN meeting staple, Urowalk, and during the popular Nurses’ Dinner on Sunday.

Should you have any questions and suggestions, feel free to drop by the EAUN booth located in the Green Area on Level 0.

On behalf of the EAUN Scientific Committee who have put this excellent programme together, we wish you a truly educational and enjoyable experience at EAUN18!

Stefano Terzoni

Download the EAU Events App

The easiest way to navigate at EAUN18 with your smartphone or tablet!

Search for ‘EAU Events’ in your app store!
General Information

Abstracts, Posters & Videos
All abstracts and posters are available online at www.eaun18.org and through the congress App as of Friday 16 March 2018.

Access to Session Rooms
Only congress delegates with a valid badge, have access to session rooms. Seating is regulated on a first-come, first-served basis. We recommend delegates to go to session rooms well in advance. Due to safety regulations, the organisers will close the session room when all seats are taken. It is not allowed to stand in the aisles of the rooms.

Address Congress Venue
Bella Center Copenhagen
Center Boulevard 52300
Copenhagen, Denmark
www.bellacentercopenhagen.dk

Bella Center Copenhagen is centrally located in Ørestad and has its own Metro station. The congress centre is just 6 kilometres away from Copenhagen Airport and 8 kilometres away from Copenhagen city centre. Visit the venue’s website for further information on transport routes and connections.

App
The EAUN18 App is the easiest way to navigate the congress and provides instant access to key information on EAUN18.

Browse the scientific programme and create your personal programme using the planner. Find meeting rooms and exhibitor booths by scrolling the floor plans. Via the personal congress bag icon, you can save relevant links to digitally retrieve or review after the congress. Offline use of the App is possible. Download the EAU Events App for free in the Play Store (Android) or App Store (iOS).

Badge Tracking System
Congress delegates have a QR code on their badge which enables them to leave their contact details with exhibitors. The badge will also be scanned at the entrance of session rooms to gather CME and statistical information. EAU bears no responsibility for data scanned by third-parties.

Bank and Exchange
The official currency of Denmark is the krone (kr). There is an ATM in the lobby of the Bella Sky Hotel (charging a transaction fee for withdrawals). There are more ATM’s at shopping mall “Field’s” located at approximately 700 meters. The closest bank is Danske Bank at is 2.6 km from the Bella Center.

Best Posters
The three best posters can be viewed at the e-Poster Area, accessible during congress hours in the Orange Area and through the congress website as of Sunday, 18 March 2018, 15.00 hrs.

Business Centre
There is a business centre in the Green Area at the West entrance which sells stationery items and has copy and print facilities. Computers with internet access are available on the 1st floor of the AC Bella Sky Hotel (which is linked to the congress venue).

Certificate of Attendance
A Certificate of Attendance for EAUN18 can be printed online as of Wednesday, 21 March 2018. You will need your registration number (below the barcode on your badge) to print the certificate.

Charge & Connect Area
A special “Charge & Connect Area” with seating areas, free internet, work stations and power outlets is available at booth J16 in the Exhibition Hall (Red Area).

Cloakroom and Luggage
At the main entrance as well as the West entrance cloakrooms are available during congress hours. Please collect all personal belongings at the end of the day.

CME Accreditation
The EAUN applied for accreditation of the 19th International EAUN Meeting for nurse specialists and nursing and care professionals in the Netherlands.
Congress Bag
Registered participants can collect a congress bag in the Registration Area (Blue Area).

Congress Newsletter: European Urology Today Special Edition
Special daily congress newsletters will be distributed at various locations in the congress venue on Saturday, Sunday and Monday. The newsletters feature on-site interviews and background information on sessions and all other relevant subjects.

Copenhagen Information
Information on Copenhagen will be available in the Registration Area (Blue Area).

EAU Booth & EAUN Booth
Visit the EAUN Booth (Green Area, next to the stairs on level 0) for information on all EAUN activities, and to pick up the EAUN programme book. Also for coffee and information from other nursing organisations this is the place to go.

For information on membership status and membership application, you are welcome to visit the EAU Booth in the Exhibition (booth H69, Red Area).

EAU Education Office - European School of Urology (ESU)
The European School of Urology (ESU), working with European faculties, will provide high quality international educational courses in urology during EAU18 and EAUN18. For more information please check the EAU18 and EAUN18 App.

EAU Patient Information
EAU Patient Information is the trusted portal for patients and urologists, offering evidence-based information on diagnostics, treatments and patient support. Delegates are welcome to visit the EAU Patient Information Corner for a presentation of animated videos on surgical procedures developed for patients. The EAU Patient Information Corner is located next to the EAU Booth (booth H69 in the Exhibition Hall/Red Area).

EAU Policy on Live Surgery
The EAU’s official policy on Live Surgery Events offers organisers a clear framework within which to plan and perform live surgeries. The main principle for these guidelines is that patient safety must take priority over all other considerations during live surgery. Read more on www.uroweb.org.

Electricity
Denmark, like most other European countries, has 230-volt AC, 50Hz current and uses two-pin continental plugs. Visitors from the UK and Ireland will need a plug adaptor for electric appliances, while those from North America need a power converter to use 110/125V appliances.

Emergency Information and First Aid
There is a medical unit for first aid in the congress venue. In case of emergencies, contact a security personnel or call the following numbers:
Ambulance/Fire (Emergency) - (+45) 112
Police (Non-emergency) - (+45) 114

EAUN19 Meeting
The 20th International EAUN Meeting will be held in Barcelona on 16-18 March 2019, in conjunction with the EAU19. This unique three day meeting provides the ultimate opportunity to interact with leading urology nursing and medical professionals and to find inspiration for advanced nursing practice to
take forward in your own work environment. The scientific programme will bring together the latest developments in research as well as best practice and current clinical guidelines, through interactive sessions and (state-of-the-art) lectures, providing an opportunity to discuss and share your important clinical experiences and practice.

European Urology, EU Focus & EU Oncology

*European Urology*, ‘The Platinum Journal’, is the official journal of the European Association of Urology (EAU). This international peer reviewed journal devoted to urology is published since 1975 and reaches nowadays over 20,000 readers.

*European Urology Focus* (EU Focus) is a sister journal to European Urology and the second official publication of the European Association of Urology (EAU). EU Focus is published at least 6 times per year in an electronic format. Each issue includes a series of invited, thematic reviews, together with original reports, correspondence and introductory editorials on a wide range of urological issues.

*European Urology Oncology* (EU Oncology) is the latest sister Journal to European Urology and the first official publication of the EAU fully devoted to the study of genitourinary malignancies.

Exhibition

This exhibition is one of the premier events worldwide for showcasing new and established products as well as cutting-edge medical technology. High-profile companies as well as small innovative businesses join the exhibition – offering insights and opening the doors onto the world of modern urology.

In the Exhibition Area you also find a Café and a large Catering Area (I46), the EAU Booth (H69), the EAU Video Library (F69), the European Urology booth (C29) and the Charge & Connect Area (J16).

**Exhibition Hours:**
- **Saturday, 17 March**: 09.30 – 18.15 hrs.
- **Sunday, 18 March**: 09.30 – 18.15 hrs.
- **Monday, 19 March**: 09.30 – 15.30 hrs.

**Exhibition Guide**

The Exhibition Guide, an exhibition floor plan and overview of all exhibitors with their company outline is included in the Programme-at-a-Glance. The Programme-at-a-Glance is inserted in the Congress Bag. This information is also available in the congress App.

**First Aid**

There is a medical unit present for first aid at the congress venue near the West entrance (Green Area) on Level 0, indicated on the directional signs with the first aid symbol (+). In the event of a medical emergency dial internal telephone number +45 3247 2024.

**Food & Beverage**

**Coffee Corners**

At the following coffee corners you may enjoy coffee, tea, snacks and/or pastries:
- **Orango Lounge** – Red Area, Exhibition area
- **Grab’n’Go area** – Orange Area
- **Coffee Pop-up** – Green Area, (opposite the EAUN booth)

**EAU Extended and Pocket Guidelines**

EAU members can collect a copy of the Urological Guidelines 2018, free of charge, at the EAU Booth (booth H69 in the Exhibition Hall/Red Area). This publication is also sold to EAUN and other non-EAU members.

**EAUN Guidelines**

All delegates can collect EAUN guidelines at the EAUN Booth (Green Area, Level 0, next to the stairs) as long as stock lasts.

**Historical Exhibition**

The EAU History Office is presenting an historical exhibit on ”Urology in Scandinavia and the Ernest Desnos Prize” (booth H69 in the Exhibition Hall/Red Area).

**Hotel Accommodation**

The company K.I.T. Group has been contracted to handle the hotel accommodation for congress participants. Their staff will be available at the Hotel Desk in the Registration Area (Blue Area).

**Industry Partners**

We would like to thank our industry partners. Please see page 53 for the industry acknowledgements.

**Insurance**

The organisers do not accept liability for any personal
General damage. Participants are advised to arrange their own personal insurance.

Language
The meeting will be conducted in English. No translation will be provided.

Learning Objectives EAUN Meeting
Delegates attending the EAUN International Meeting will be able to:
• Review emerging evidence, innovative techniques and scientific advances relevant to the field of urological nursing;
• Review the latest data and emerging trends from studies in clinical and translational research relevant to nursing and urological care generally;
• Discuss the evolving role of the EAUN in promoting higher standards of urological nursing care, urological nursing research and practice development;
• Enhance their knowledge of evidence-based approaches to the management of urological disease;
• Gain new knowledge on emerging diagnostic and risk-assessment strategies in the management of urological disease;
• Enhance their practical knowledge and skills through educational activities, workshops and courses;
• Gain exposure to new developments in evidence-informed, multi-professional urological care including medical technology, drug therapy, medical devices and new cutting edge technology through visiting the EAU Congress Exhibition;
• Communicate, collaborate and network with representatives of a large international audience – medical professionals, national urological societies, patient groups, medical industry and the media.

Lost and Found
For assistance, report any lost or found items to the Information Desk in the main entrance hall (Blue Area).

Membership EAUN
Become a member of the EAUN or settle your membership fees at the EAU Booth (H69) in the Exhibition Hall.
Urologists can visit the special EAUN counter in the EAU Booth (H69) to learn more about EAUN membership and register their nursing colleagues as members.

Mobile Phones
Sound and camera flash of mobile phones and tablets must be switched off during sessions.

Opening Ceremony and Awards
Participants and exhibitors attending the congress are invited to the official Opening Ceremony on Friday, 16 March at 18.00-19.30 in the eURO Auditorium (Green Area). During the Opening Ceremony the new Honorary EAU Members will be announced and the following EAU Awards will be delivered: Willy Gregoir Medal, Frans Debruyne Life Time Achievement Award, Crystal Matula Award, Hans Marberger Award, Prostate Cancer Research Award 2018 and the new Ernest Desnos Award 2018. The Opening Ceremony will be followed by a Networking Reception in the Green Area until 21.00 hrs.

Personal Planner
Do not miss anything during this year’s congress, use the EAU Personal Planner!
• It is fully integrated with the scientific programme of the congress
• You can select your priority sessions and export them to your Outlook, Google Calendar or print them out.
Visit the congress website for more information: www.eau18.uroweb.org/scientific-programme/overview/.

Kindly note that the planner on the website and the planner in the App do not exchange information. You can use either one for your planning.

PosterSessionOnline Service
Poster presenters who created their posters through the “EAU PosterSessionOnline Service”, can collect their posters at the Speaker Service Centre in the Orange Area.

Poster DVD EAU18
A DVD with a collection of scientific posters from the EAU18 Congress is inserted in all congress bags.

Prayer Room
Special rooms dedicated to prayer are located near the West Entrance on level 0 (Green Area).

Presentation Training Centre
Mrs. Vivienne Parry (UK) gives Individual Presentation Skills Training Sessions to help improve presentation and delivery skills. The one-on-one half hour sessions
are free of charge and available to all speakers. Appointments for this very popular training session should be made at the Speaker Service Centre (Orange Area).

Press
Journalists and medical/science writers can obtain a free registration to the congress. Registered press members are welcome to use the facilities at the EAU Press Centre on level 0 (Green Area near the West Entrance). Internet access, printer and photocopy facilities are provided.

Registration Area
All registration desks/facilities are located in the Blue Area.

Resource Centre
Scientific content of the meeting such as abstracts, videos and PPT presentations will be available online in the Resource Centre (eau18.org/rc). Access the Resource Centre using your congress registration login (MyEAU), your EAUN member login (MyEAU) or the barcode number on your congress badge (type the number without the *).

Restaurants
The Danish cuisine originating from the peasant population’s own local produce, was enhanced by cooking techniques developed in the late 19th century and the wider availability of goods after the Industrial Revolution. Smørrebrød (open sandwiches) or kogt torsk (poached cod) are typical Danish dishes which you have to try when in Copenhagen. Kindly ask “Wonderful Copenhagen” (Blue Area) for restaurant tips and suggestions.

Social Media
The EAUN stimulates the use of social media at the congress to encourage an open discussion on urology science and experiences at the congress. EAUN Meeting speakers, opinion leaders, delegates and media share their ideas, commentary and photos on various social media channels. Use #EAUN18 to discuss the Meeting, and join the conversation!

Speaker Service Centre
The Speaker Service Centre is located at the Orange area. For details, ask our hostesses or check the congress website.

Transportation pass
For transportation information please go to the Transportation Desk (in the Registration Area/Blue Area). Delegates will obtain a free transportation pass valid on all public transport.

Upcoming Meetings
Posters and other information on upcoming meetings can be displayed in the “Upcoming Meetings” promotion area (booth D70 in the Exhibition Hall/Red Area). It is strictly forbidden to put up promotional material at any other location in the building.

Video Library
The EAU Video Library is located in the Exhibition Hall/Red Area (booth F69). A wide choice of EAU videos, including all videos presented in Copenhagen and at previous EAU Congresses, can be viewed on individual monitors. All videos can be copied to a DVD which can be collected during exhibition hours, a service that is provided free of charge to all congress delegates. On Tuesday, 20 March DVD’s can be collected in the Registration Area (Blue Area) at the “Support Desk”.

Wi-Fi
Free Wi-Fi is accessible throughout the congress venue during congress hours. Network name: EAU18 and Password: Copenhagen18
Speaker Guidelines

Speaker Service Centre
Only digital presentations will be accepted during the congress. All presentations (format 16:9) should be handed in at least three hours prior to the start of the session at the Speaker Service Centre (Orange Area). If you have an early presentation, please hand in your presentation on the previous day! Failure to do so could result in presentations not being available for projection when required.

Opening hours
Thursday, 15 March 14.00 - 19.00 hrs.
Friday, 16 March 08.00 - 18.30 hrs.
Saturday, 17 March 06.45 - 19.30 hrs.
Sunday, 18 March 07.00 - 19.15 hrs.
Monday, 19 March 07.00 – 17.30 hrs.
Tuesday, 20 March 07.00 - 13.00 hrs.

If you are presenting a poster
Posters must be put up in the room 15 minutes prior to the start of the session. The poster boards are numbered and your poster should be mounted on the board which corresponds with your abstract number. Pushpins are available in the session room. Please remove your poster immediately at the end of the session. A maximum of 6 PowerPoint slides (including a title and conflict of interest slide) are allowed during standard poster presentations. For extended poster presentations, a maximum of 6 pre-defined PowerPoint slides (including a title and conflict of interest slide) are allowed.

If you are a chair person
Locate your session room in time. Please be in your session room at least 15 minutes prior to the start of the session. Kindly note that:
• Speakers should strictly observe timing.
• Discussants should first clearly state their name, institution and country of origin.
If a question is being asked, please note that the delegate should first clearly state his/her name, institution and country of origin.

Disclose links to the industry
The EAUN Scientific Congress Office requests that you disclose to the audience any links you may have with the industry related to the topic of your lecture at the beginning of your session. A link can be: Being a member of an advisory board or having a consultancy agreement with a specific company.

Prize-winning posters
If a poster PDF has been submitted to the EAUN before the start of the annual meeting the winning posters will be made available in the digital best poster area from Sunday evening.

### Plenary Session 1

**09.00 - 10.00**  
**Urology nursing tomorrow: If not us then who?**

**Green Area, Room 12 (Level 1)**

**Chair:** S. Terzoni, Milan (IT)

**Aims and objectives of this session**

A new generation of urology nurses with new expectations and different skills and abilities is forming the new nursing workforce. This generation, called Generation Y, was born between 1980 and 1998, and is now aged in their 20’s and 30’s. They grew up with computers, they are not scared to give their opinion. The “older” nurses (Generation X) are less technologically advanced and have other ways of thinking and behaving.

How can we deal with the generational differences? How can we avoid misunderstandings, miscommunications and clash amongst the generations? But also important as Generation X nurses: how can we transfer our knowledge and experience to Generation Y?

The aims and objectives of this session

Disorders of Sex Development (DSD) or ‘intersex’ is a rare condition. Some people are born with variations in chromosomes, gonads, sex hormones or anatomy. Sometimes this is clear at birth, but sometimes this will only be detected during puberty or even in adulthood when people want children and infertility is a part of this condition.

The aim and objective of this session is to learn more about the latest insights in DSD. Over the years we learned from patients that psychological care/support is very important, so we end this session with a presentation about psychological aspects of medical treatments.

10.15 - 10.17 Introduction
H. Cobussen-Boekhorst, Nijmegen (NL)

10.17 - 10.37 Overview of the latest insights in Disorders of Sex Development (DSD)
M.M.C. Van Den Heijkant, Leuven (BE)

10.37 - 10.52 Living with intersex/DSD
M.J. Van Der Have, Nijmegen (NL)

10.52 - 11.12 Psychosocial aspects of medical treatments in individuals with DSD
T.C. Van De Grift, Amsterdam (NL)

11.12 - 11.15 Conclusion
H. Cobussen-Boekhorst, Nijmegen (NL)
Thematic Session 2

Prostate cancer: What is new?

Green Area, Room 11 (Level 1)

Chair: F. Geese, Dublin (IE)

Aims and objectives of this session

Prostate cancer is the most common cancer in men in Europe and worldwide. The introduction and the widespread use of Prostate Specific Antigen testing (PSA) in 1994 and of the following diagnostic procedures (biopsy) and pathology stage (Gleason score) remain the current way to screen and/or to diagnose prostate cancer.

We have noticed that MRI is playing an increased role in diagnosis of prostate cancer. Hormonal therapy combined with chemotherapy is the new standard for primary metastatic prostate cancer. Imaging techniques are continually improving (PSMA Scan). In a few years we will use the genomes in prostate cancer to predict which treatment is the most suitable for patients.

PSA and the Gleason score are today’s techniques. PSA remains controversial concerning the screening of prostate cancer. Is it still the right method to screen? The Gleason score, as a pathological index to determine the aggressiveness of prostate cancer, has existed for more than 40 years. Several studies have shown that Gleason score 4+3=7 has a worse prognosis than Gleason score 3+4=7. The classification of the aggressiveness of prostate cancer needs to be more accurate. Are these the final days of the Gleason score?

The role of the nurse in prostate cancer is evolving from urology nurse to expert urology nurse. This expertise contributes to a high quality of care in all the phases (screening, treatment, palliative care, survivorship). Nurse-led clinics have grown in number in recent years. The question is: how can a nurse-led clinic improve the supportive care in prostate cancer?

10.15 - 10.20 Introduction
F. Geese, Dublin (IE)

10.20 - 10.35 Detecting prostate cancer: Has PSA had its day?
L. Fleure, London (GB)

</tr>
</tbody>
</table>

**Chair:** J.T. Marley, Newtownabbey (GB)

**Aims and objectives of this session**

Genetic counseling is “the process of helping people understand and adapt to the medical, psychological, and familial implications of genetic contributions to disease.” Traditionally, this process includes the family and medical history, risk assessment, a comprehensive education for potential genetic testing, informed consent, and psychosocial assessment and support. It will remain critical that genetics counselors help patients personalise their choices about whether and when to undergo genomic testing, and the implications of learning genomic variation, along with all its medical and social implications as individuals and within their family structure.

This session is aiming to give an overview of patient needs in genetic counselling and how genetic counselling could look like in urology in the near future.

**Thematic Session 4**

**Joint EAUN-ICS Session: Conservative bladder care management**

**Green Area, Room 11 (Level 1)**

*Chair:* R. Willener, Berne (CH)

**Aims and objectives of this session**
In western countries, the population is growing older and dementia is one of the most common diseases in this group. Bladder problems are also more common in this group. In most cases, conservative management is the first or the only step. Nursing interventions are important in conservative management, but is this also the case for this group of patients?

The last speaker will present the project ‘Quality of Continence Care’ last year in the Netherlands, a cooperation of all parties involved in the prescription of devices for continence care and the instruction and coaching of patients. After the presentation there will be time to discuss this topic in a broader (European) perspective.

We will start this session with exciting developments in continence care. What will the future bring us?

**12.45 - 13.00**
**Exciting developments in continence care**
J.P.F.A. Heesakkers, Nijmegen (NL)

**Conclusion**
### Abstract Poster Session 1

**14.15 - 16.00**  
Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

**Green Area, Room 12 (Level 1)**

*Chairs:*  
J. Verkerk-Geelhoed, Nieuwegein (NL)  
B.T. Jensen, Aarhus (DK)

Poster viewing of 30 minutes. Short introduction of 4 minutes by the chair of the session. Presentations will take place on stage. Standard presentations are 6 minutes in length, followed by 2 minutes for discussion.

**P01**  
**Trial of void: What is the least trialling method?**  

**P02**  
**More patients, more diapers; Norm in hospital?**  
S.L. Ng, K.Y. Yu, I.. Lee (Hong Kong West Cluster, Hong Kong)

**P03**  
**How urology nurse clinic helps in early detection and management of urinary tract stones among patients presented with unilateral or bilateral loin(s) pain?**  
S.L. Ng, L. Yeung, Y.B. Tse, P.H.. Ng, YY. Sun, T.. Lai, B. Ho , J. Tsu, M.K. Yiu (Hong Kong West Cluster, Hong Kong, Hong Kong)

**P04**  
**Grit in the waterworks – patient experiences of living with stones in the upper urinary tract**  
P.B. Svankjær, A. Holm Jensen, T. Søndergaard Sørensen, H. Haslund-Thomsen (Aalborg, Denmark)

**P05**  
**Development and validation of an assessment tool to CIC catheters by the user**  
G. Azevedo, G.M. Assis, A.F. Negri, S. Veiga, C.F. Galli, A. Moser (Sorocaba, Brasilia, Curitiba, Brazil)

**P06**  
**Workplace incivility: Perceptions of urological nurses**  
P. Ward-Smith, J. Hokanson Hawks, S. Quaillich (Kansas City, Omaha, Ann Arbor, United States of America)

**P07**  
**Risk factors predisposing to bacterial colonization of ureteral stents**  
F. Ahmed (Kuwait, Kuwait)

**P08**  
**Quality of patients’ life with neurogenic bladder**  
E. Zouzoula, A. Kiora, V. Katsarou (Santorini, Greece)

**P09**  
**Incidence and impact of urinary tract infections (UTI) when starting intermittent catheterisation (CIC) and the effect on quality of life**  
H. Mulder (Groningen, The Netherlands)
**Thematic Session 5**

14.15 - 15.45  
**Shared decision making: Putting patients at the heart of urology care**

*Green Area, Room 11 (Level 1)*

*Chair:* C.N. Tillier, Amsterdam (NL)

**Aims and objectives of this session**

The time the patient doesn’t play any role in decision making about his/her treatment is over. There is a desire and also a duty to involve patients in the choice of his/her therapy. Do all the patients want to be involved in shared decision making? We think we provide enough information to let the patient decide, but do we? How can it be possible that some patients treated for localised prostate cancer regret their choice of treatment?

Patient Reported Outcome Measures (PROMs) are now recognised as the most appropriate instruments to assess the effectiveness of healthcare interventions from the patient’s perspective. As health care professionals, how do we measure the satisfaction of urological patients, and how do we assess the quality of the care we deliver?

---

14.15 - 14.35  
**Using Patient Reported Outcome Measurements System (PROMS) as a tool for clinical decision making**  
A.D. Seyer-Hansen, Aarhus (DK)

14.35 - 14.55  
**Are patients well informed to be able to make a treatment choice without regrets?**  
M.A. Van Stam, Utrecht (NL)

14.55 - 15.15  
**Patient-centered information material: Do they make a difference in shared decision making?**  
F. Geese, Dublin (IE)

15.15 - 15.35  
**Shared decision making in patients with stones**  
E.A. Grainger, Aarhus (DK)

15.35 - 15.45  
**Discussion**
### Thematic Session 6

**End-of-life care in urology**

**Green Area, Room 11 (Level 1)**

*Chair: F. Picard, Bordeaux (FR)*

**Aims and objectives of this session**
 Patients with advanced and terminal urologic illness facing issues, from the framework of care planning based on defining patient-specific and family-specific goals of care, to palliative management strategies for common symptoms and syndromes that these patients and their families experience. This session focuses on the management of common urologic issues that may arise in the course of care for all patients at the end of life, as well as the impact of these conditions on caregivers.

## Thematic Session 7

**Cyber safety equals patient safety**

**Green Area, Room 12 (Level 1)**

**Chair:** V. Geng, Lobbach (DE)

**Aims and objectives of this session**

In our daily life the digital world is everywhere: Whatsapp, e-mail, Facebook, Instagram, etc. But our working environment is also becoming more and more digital. This can have many advantages, but allows also for disadvantages, like safety problems. A system that can be hacked.

There are also potential safety problems on a personal level for you and your patients. What can we do and what should we absolutely avoid? Digital care will be the future in any case. Digitally integrated care is something we must embrace. Are you ready for this next step?

## State-of-the-art lecture 1

### Review TRUS guidelines - in the starting blocks

**Green Area, Room 11 (Level 1)**

*Chair: G. Villa, Milan (IT)*

**Aims and objectives of this session**

The TRUS prostate biopsy guidelines were published in 2011. In a short time many things have evolved: the sextant biopsy scheme became obsolete, the 12 cores scheme was recommended by the EAU but it is still not clear which cores scheme is optimal. Nowadays it is presumed that patients using oral anticoagulants can undergo TRUS prostate biopsy safely without staking their medicine. Do we have any evidence about that? And what about other oral anticoagulants, including the novel oral anticoagulants?

In some countries such as the UK, nurses perform TRUS prostate biopsies. Are the quality and the safety the same when a biopsy is performed by a nurse or a urologist? The patient needs to be informed about the TRUS prostate biopsy procedure, about potential pain, and possible complications. Does patient information help to reduce the physical and psychological impact of a prostate biopsy? The panel that is currently reviewing the EAUN TRUS guidelines is looking into these questions. Their preliminary findings will be presented to the audience.

Thematic Session 8

08.30 - 09.30  Bone health: Short and snappy

Green Area, Room 12 (Level 1)

Chair:  L. Drudge-Coates, London (GB)

Aims and objectives of this session
Men with advanced or metastatic prostate cancer commonly receive long-term treatment with Luteinizing Hormone-Releasing Hormone (LHRH) agonist therapy. Similar to oestrogen deficiency in postmenopausal women, testosterone deficiency among these men, negatively affects bone health which left undetected or untreated, increases the risk of osteoporosis and fractures, adding further to the wider systemic effects of this treatment, that affect both physical and psychological well being.

As nurses often involved in the administration of such treatments, we have an obligation and opportunity to address these issues, as part of a multi-professional team approach. The session will therefore outline the basic biological aspect of the treatment and its effects, nursing assessment and the importance of diet and exercise and consider the psychological effect of poor bone health.

08.30 - 08.35  Introduction
L. Drudge-Coates, London (GB)

08.35 - 08.50  Bone biology and the impact of Luteinising Hormone-Releasing Hormone (LHRH) -therapy

ESU Hands-on Training Courses

ESU/ESFFU Hands-on Training Course in Sacral neuromodulation

Yellow Area, Room 3 (Level 0)

Course description
A practical hands-on workshop that will allow the participants to practice on models the different steps of performing sacral neuromodulation including primary percutaneous nerve evaluation, tined lead and battery implantation and programming and also troubleshooting.

Aims and objectives
• Understand the indications for SNM
• Be able to perform the different steps of the procedure in a standardized format
• Be able to troubleshoot problems with SNM

Target audience
Doctors, Nurses, technicians and clinical scientists who have little or no knowledge of sacral neuromodulation.

Sunday, 18 March
HOT 17 09.00 - 10.30
HOT 18 11.00 - 12.30

State-of-the-art lecture 2

09.45 - 10.15  Urostoma: Complex problems and effective solutions

Green Area, Room 12 (Level 1)

Chair:  G. Villa, Milan (IT)

Aims and objectives of this session
In this state-of-the-art lecture, evidence-based and best practice solutions for continent and incontinent urostomas will be discussed.

Some of these problems are common in both urostomas, but there are also specific problems for continent stomas like Mitrofanoff, Monti, Kock pouch, Indianapouch or for incontinent stoma like a Bricker derivation.

09.45 - 09.50  Introduction
G. Villa, Milan (IT)

09.50 - 10.10  Promoting solutions for complex problems in continent and incontinent urostomas
N. Love-Retinger, New York (US)

**Aims and objectives of this session**

Despite smoking and risky alcohol drinking being modifiable risk factors for cancer as well as postoperative complications, perioperative smoking and alcohol cessation counselling is often ignored. Little is known about how cancer patients experience smoking and alcohol interventions in relation to surgery.

This session will present findings from a qualitative study conducted in two urology out-patient clinics. The aim of this study was to explore how bladder cancer patients experienced a perioperative smoking and alcohol cessation intervention in relation to radical cystectomy.

### Plenary Session 2

**Sunday, 18 March - EAUN Programme**

#### 10:30 - 11:30  
**Urinary sepsis: A disaster hiding in plain sight**

**Green Area, Room 12 (Level 1)**

*Chair:*  
S. Terzoni, Milan (IT)

**Aims and objectives of this session**

Urosepsis or urinary sepsis is a serious infection that spreads through the bloodstream from the urogenital tract. Urosepsis concerns about 25% of all the sepsis and is always a medical emergency because it is life threatening. What is the exact definition of urosepsis? How do we differentiate urosepsis from a bacterial urinary tract infection? As nurses, how can we prevent this severe condition, and when patients have a urinary sepsis how can we manage it?

# State-of-the-art lecture 4

**Green Area, Room 11 (Level 1)**

**Chair:** C.N. Tillier, Amsterdam (NL)

**Aims and objectives of this session**

This state-of-the-art lecture explores and describes the feelings of uncertainty that patients experience during pelvic floor rehabilitation for post-prostatectomy urinary incontinence. It presents the results of a study investigating such feelings and their impact on rehabilitation outcomes and adherence to treatments. This state-of-the-art lecture also describes nursing strategies that, according to the patients, have proved useful for managing uncertainty, as well as their clinical results.

Abstract Poster Session 2

11.45 - 13.30 Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

Green Area, Room 12 (Level 1)

Chairs: F. Geese, Dublin (IE)  
B.T. Jensen, Aarhus (DK)

Poster viewing of 30 minutes. Short introduction of 4 minutes by the chair of the session. Presentations will take place on stage. Standard presentations are 6 minutes in length, followed by 2 minutes for discussion.

P10 Innovation in uro-oncology specialist nursing care: The UCAN model of survivorship  

P11 Unsupervised home-based healthy gaming in prostate cancer patients receiving androgen deprivation therapy improves physical function  
B.R.V. Villumsen, M.G.J Jørgensen, J.F. Frystyk, B.H. Hørdam, M.B Borre (Holstebro, Aalborg, Aarhus, Copenhagen, Denmark)

P12 Physical activity during and after treatment improves quality of life of men with prostate cancer  
S. Wildeman, A. Van Der Poel, P. Hamberg, S. De Vries, E. Bernie (Rotterdam, The Netherlands)

P13 Information provision and coherence with quality of life in curative treated patients with prostate cancer  
J. Theunissen, M. Van Der Wal, E. Bossema, I.M. Van Oort (Nijmegen, The Netherlands)

P14 Quality of life of spouses living with men undergoing androgen deprivation therapy for prostate cancer  
J. Avlastenok, K. Rud, H. Køppen, L. Wendt-Johansen, H. Wested, P. Busch Østergren (Herlev, Denmark)

P15 Exploring the lived experience of gay men with prostate cancer: A phenomenological study  
R. McConkey, C. Holborn (Galway, Ireland; Sheffield, United Kingdom)

P16 Clinical application of early comprehensive nursing interventions in prevention of urinary retention in patients with orthotopic ileal neobladder  
L. Yuwei, X.M. Li (Chong qing, China)

P17 Higher body-mass index is associated with worse quality of life, maladaptive coping, and higher unmet needs in muscle invasive bladder cancer survivors treated with cystectomy and urinary diversion  
N. Mohamed, T.M. Leung, J. Sfakianos, R. Mehrazin (New York, United States of America)

P18 Smoking is associated with post-surgical difficulties and less adaptation to treatment outcomes in bladder cancer patients  
N. Mohamed, T.M. Leung, R. Mehrazin, J.S. Sfakianos (New York, United States of America)
Sunday, 18 March - ESU Courses

EAUN - ESU Course 1

12.30 - 14.45  Sexual dysfunction in men and women: The same but different?

Green Area, Room 11 (Level 1)

Chair:  A. Salonia, Milan (IT)

Aims and objectives
What is the overall perception of the relevance of sexual health in the contemporary world? What does it entail for you as a nurse, when a patient (both genders) undergoes major urological and pelvic surgery? How to efficiently accomplish patients’ sexual unmet needs after the unfortunate case of a cancer diagnosis?

This course provides an overall introduction to the field of sexual health as a proxy of overall health (both genders) with a closer look at the relevant role a nurse may have in supporting and taking care of an oncologic patient (both genders), mostly undergoing major pelvic surgery.

Part 1: Sexual dysfunction

12.30 - 12.50  Sexual dysfunction in both genders: Classification and epidemiology
A. Salonia, Milan (IT)

12.50 - 13.30  Female sexual function and dysfunction
A. Rantell, London (GB)

13.30 - 14.00  Break

Part II: Sexual dysfunction in men

14.00 - 14:15  Power is nothing without control
F. Castiglione, London (GB)

14.15 - 14.30  Postoperative sexual dysfunction - caring for men’s sexual frailty
J. Verkerk-Geelhoed, Nieuwegein (NL)

14.30 - 14.45  Discussion and closure
ESU Hands-on Training Courses

ESU/ESFFU Hands-on Training Course in Urodynamics

Yellow Area, Room 3 (Level 0)

Course description
This course aims to provide a practical course offering an interactive “hands-on” environment for doctors, nurses and technicians to improve their skills in urodynamics, with an emphasis on practical aspects including equipment used, interpretation of traces, quality control and trouble-shooting. The use of recorded tests, access to equipment and small groups means that individual problems can be addressed. All the speakers are involved in similar “hands-on” courses, which have ran successfully in the United Kingdom and abroad in major international conferences. The small group format has been shown to work well in addressing individual needs. Access to teaching aids and equipment will simulate the clinical scenario as much as possible within the constraints of the conference setting.

Aims and objectives
The aim is to teach and emphasise Good Urodynamics Practice using accepted international standards. At the end of the workshop delegates should feel more confident in their practice of urodynamics.

Target audience
For all participants with an interest in Urodynamics

Sunday, 18 March
HOT 46 13.00 – 16.00 Room 3

Chair:  H. Hashim, Bristol (GB)

Tutors:  M. Drake, Bristol (GB)
A. Gammie, Bristol (GB)
A. Garcia Mora, Mexico City (MX)
L. Thomas, Bristol (GB)

Registration fee including 25% VAT
EAU members €50.00
Non-EAU members €32.50
Residents, Nurses (EAU members / EAU non-members) €32.50
Expert-Guided Poster Abstract Session

14.00 - 14.30 Concise poster presentations guided by experts

EAUN Poster Area (Next to the EAUN Booth)

Chairs:  L. Drudge-Coates, London (GB)
         S. Vahr Lauridsen, Copenhagen (DK)

Introduction
L. Drudge-Coates, London (GB)

EGP 1: Preparation education and training for pessary fitting: Conclusions of experienced nurse providers in the United States
G. L. Hooper, Tuscaloosa (US)

EGP 2: The nurse role in ‘one-stop’ stone management in a private hospital in Hong Kong
H.Y. Luk, Hong Kong (HK)

EGP 3: Nurse treatment in the urology clinic following robotic radical cystectomy
A. Bashir, Haifa (IL)

EGP 4: Delivering a nurse-led survivorship programme to address the concerns of men who have undergone a radical prostatectomy
M. Cremin, Dublin (IE)

EGP 5: Preoperative biofeedback improves post-prostatectomy incontinence better than pelvic exercises alone: A meta-analysis
S. Terzoni, Milan (IT)

EGP 6: Position of hospital nurses on the issue of sexual health
L. Balin, Karmiel (IL)
## Thematic Session 9

**15.00 - 16.00** Complementary or alternative medicine in urology

### Green Area, Room 11 (Level 1)

**Chair:** V. Geng, Lobbach (DE)

**Aims and objectives of this session**
The use of Complementary and Alternative Medicine (CAM) among the population is widespread and appears to be increasing. It can be used to protect, to boost the immune system, to treat certain symptoms, to prevent diseases or just be a way to lead a healthy life.

As nurses, we have noticed an increase of use of CAM among our patients. Examples are drinking cranberry juice to prevent urinary tract infections, selenium in prostate cancer etc. Do we, as urology nurses, know the exact definition of the CAM? Are we only talking about herbal products or also about other types of products? Is there any evidence about the efficacy of complementary or alternative medicine? Is it safe to use the CAM in urology? All these questions we have will be answered during this session.

15.00 - 15.05 **Introduction**
V. Geng, Lobbach (DE)

15.05 - 15.20 **Complementary or alternative medicine - set in context**
N. Love-Retinger, New York (US)

15.20 - 15.35 **The uses and effect of cannabis oil in prostate cancer care**
C.N. Tillier, Amsterdam (NL)

15.35 - 15.50 **The role and evidence of phytotherapy in BPH**
F.M.J. Martens, Nijmegen (NL)

15.50 - 16.00 **Discussion**

### Abstract Video Session

**15.00 - 15.30** Educational videos for training and teaching

### Green Area, Room 12 (Level 1)

**Chair:** S.J. Borg, Msida (MT)

**V1** Video urodynamic study in children: A healthcare training video
V. Decalf, I. Ragolle, A. Ploumidis, P. Hoebeke, K. Everaert, A.-F. Spinoit (Ghent, Belgium; Athens, Greece)

**V2** Prevention of catheterisation trauma by adopting a new urethral catheterisation device (UCD™)
M. Dragova, A. Lock, G. Chiriaco, K. Holmes, K. Attard, S. Bugeja, F. Castiglione, A. Bamfo, A. Frost, A. Mundy (London, United Kingdom; Msida, Malta)
Specialty Session 3

16.15 - 17.30 Creating OUR Urology Nursing Curriculum – at the ‘no fairy-tale café’

Green Area, Room 11 (Level 1)

Chair: S. Terzoni, Milan (IT)

Aims and objectives of this session
It is our aim in this session to support delegates to express their opinions on an overarching question: what are the key components of a curriculum for urology nurse education that will guide our development and make us ever more fit for purpose in the 21st century?

Following the session, the views expressed by delegates will be analysed and form the basis for an academic paper that will lay the foundations for the development of an inaugural educational curriculum. This session is a landmark session and those who attend will truly be able to say in the future – I was there and I played my part. How we educate ourselves is pivotal to the future of urology nursing! Why let others determine how urology nurses should be educated? Have your voice heard!

16.15 - 16.20 Introduction by the chair
S. Terzoni, Milan (IT)

16.20 - 16.35 Introduction to the session
J.T. Marley, Newtownabbey (GB)
Brief presentation detailing:
  a. Context
  b. Questions that are to be considered, and
  c. Description of how the Café will be conducted

16.35 - 17.25 Creating OUR Curriculum
Moderators: P. Allchorne, London (GB)
           H. Cobussen-Boekhorst, Nijmegen (NL)
           F. Geese, Dublin (IE)
           B.T. Jensen, Aarhus (DK)
           R. Pieters, Ghent (BE)
           J. Taylor, Manchester (GB)
           C.N. Tillier, Amsterdam (NL)
           S. Vahr Lauridsen, Copenhagen (DK)

17.25 - 17.30 Summary and follow up plans
J.T. Marley, Newtownabbey (GB)
**Monday, 19 March - EAUN Programme**

# Thematic Session 10

**SIG Bladder Cancer: Evolution and management of BCG**

**Green Area, Room 12 (Level 1)**

**Chair:** K. Chatterton, London (GB)

**Aims and objectives of this session**

BCG is a powerful drug extensively used intravesically by urological nurses worldwide, with potential side effects, including systemic absorption, BCGosis. The aims and objectives of this session are to learn or refresh your knowledge on how BCG was discovered, its mechanism of action, effects on the bladder and impact on bladder cancer. Also, managing the side-effects, recognising them, enabling delegates to gain confidence and autonomy, by reassuring and treating patients appropriately and managing them within their nurse-led clinics. To conclude the session, we will examine a case study on lessons to be learned, which will benefit delegates within their future practice.

**08.30 - 08.35 Introduction**

**K. Chatterton, London (GB)**

**08.35 - 08.50 The evolution of BCG - How did it start? How does it work?**

**P. Anderson, Melbourne (AU)**

**08.50 - 09.05 BCG - understanding and managing the side-effects**

**C. Edmunds, Huntingdon (GB)**

**09.05 - 09.20 Case study BCG management in Europe - a case study on the lessons to be learned**

**R. Pieters, Ghent (BE)**

**09.20 - 09.30 Discussion**
### Thematic Session 11

**08.30 - 09.30**  
**SIG Continence: Management of chronic bladder problems**

**Green Area, Room 11 (Level 1)**

*Chair:*  
J. Verkerk-Geelhoed, Nieuwegein (NL)

Leadership Course

**09.00 - 12.00  Nurses in a leadership role: Cultivating your leadership**

**Orange Area, Room 6 (Level 0)**

*Chairs:* P. Allchorne, London (GB)  
C.N. Tillier, Amsterdam (NL)

**Aims and objectives of this session**

During this interactive course you will be guided in finding your role as leader. The programme will focus on leadership, effectiveness and communication in relation to patients, teams, colleagues, surgeons, and other superiors.

Together with management consultants Herman Rijksen and Jaap Zijlstra (Facilitation Profs), you will dive into topics like trust, dealing with conflicts, lack of commitment, accountability and results.

**09.00 - 09.15 Welcome and introduction**

H. Rijksen, Maarsbergen (NL)

**09.15 - 09.55 Personal behaviour and leadership**

H. Rijksen, Maarsbergen (NL)

- What are my leadership styles
- Maturity as a leader
- What are the preferences
- Can I flex my style
- Am I effective

**09.55 - 10.35 Leadership lessons**

J. Zijlstra, Maarsbergen (NL)

- Short overview leadership styles and history

**10.35 - 11.15 Insights in your organisational patterns and symptoms**

H. Rijksen, Maarsbergen (NL)

- Do we recognise your system
- Should I intervene
- What is my role as a leader

**11.15 - 11.55 Communication and communicative games**

J. Zijlstra, Maarsbergen (NL)

- Interaction with the doctor
- Communication with peers and patients
- Transactional analysis, preferences in communication

**11.55 - 12.00 Conclusion and take home messages**

**Registration**

Limited places available, a fee of €62.50 (incl. VAT) applies. Registration at the YUO booth in the EAU square (H69) in the Exhibition Hall.

</tr>
</tbody>
</table>

**Aims and objectives of this session**

On average, men have a shorter life expectancy than women. This is partly due to poor health education and a lack of preventive healthcare. There is also an issue of unhealthy behaviour and more dangerous behaviour. There is a sense of denial and indestructibility that seems to be more prevalent in men than women. Somehow it is not “manly” to be vulnerable and to ask for help.

But it is not always possible to just “work through the pain or illness.” Men must protect themselves through knowledge, preventive healthcare and early diagnoses of disease. A few clinics offer support for men, but what if men do not use this support? What have we, as health professionals, missed out to offer man-centred care? This lecture aims to give a better understanding of men’s needs and specific care.

</tr>
</tbody>
</table>

**Aims and objectives of this session**

Until the age of about 25 we speak about adolescents. The working of the adolescent brain differs from adults. What do we need to know in respect to diseases and the adolescent brain? How can we coach and train these adolescents? What are the do’s and don’ts? Our speaker will talk about this subject with a lot of humor, but in the end you will have learned a lot about the adolescent brain.

Monday, 19 March - EAUN Programme

**Thematic Session 12**

**Joint EAUN-FSUIS Session: From country to continent - universal lessons learned**

**Green Area, Room 11 (Level 1)**

*Chairs:*  
S. Vahr Lauridsen, Copenhagen (DK)  
R.N. Knudsen, Aarhus (DK)

*Aims and objectives of this session*  
If you wonder how you can benefit from a 18 year old urology organisation this is the session to attend. The aim of EAUN is to act as the representative body for European nurses in urology and facilitate the continued development of urological nursing in all its aspects and also to promote the exchange of experience and good practice between its members. To reach this goal collaboration with national societies is fundamental because local practices differ from country to country. In this session we want to highlight different learning perspectives and how it has influenced the continued development of urology nursing skills.

**10.30 - 10.35 Introduction**  
S. Vahr Lauridsen, Copenhagen (DK)

**10.35 - 10.55 Country to continent: Universal lessons learned from the Danish urology nursing perspective**  
R.N. Knudsen, Aarhus (DK)

**10.55 - 11.10 Adapting European guidelines to national needs**  
R. Willener, Berne (CH)

**11.10 - 11.25 Continent to country: Building the relationship between the EAUN and national urological nursing societies**  
S. Vahr Lauridsen, Copenhagen (DK)

**11.25 - 11.30 Conclusion**
# EAUN - ESU Course 2

## Immunotherapy in bladder cancer

**Green Area, Room 12 (Level 1)**

**Chair:** E. Xylinas, Paris (FR)

### Aims and objectives

Early results from new immunotherapy trials in the setting of metastatic urothelial bladder cancer have induced a revolution in the treatment paradigm of the disease.

Consequently, urologists and urology nurses are asked to understand the background of immunotherapy in bladder cancer treatment, the achievable results and side effects, and to know which are the current and the ongoing/future therapeutic options for their patients, provided either inside or outside of clinical trials.

In brief, the aims will be the following:

- To provide a background on the basics of immunology.
- To provide urology nurses with a state-of-the-art lecture on immune checkpoint inhibitors mechanisms of action.
- To provide urology nurses with a state of the art lecture on NMIBC treatment with BCG including management of side effects.
- To discuss the current clinical trials in MIBC in the neoadjuvant and adjuvant setting.
- To discuss the optimal clinical management of patients with metastatic disease.

Monday, 19 March - EAUN Programme

**Thematic Session 13**

**11.45 - 12.45** Rare cases and diseases in urology

**Green Area, Room 11 (Level 1)**

*Chair: K. Fitzpatrick, Dublin (IE)*

**Aims and objectives of this session**
This session will provide you with the newest knowledge about uncommon conditions that can be found in urology patients. In everyday practice it is often difficult to find literature and practical information about unusual diseases for timely managing such conditions. The speakers of this session will discuss relevant observations, indications and treatment of these cases.

**11.45 - 12.00** Birt-Hogg-Dubé Syndrome
R.H. Giles, Utrecht (NL)

**12.00 - 12.05** Questions and answers

**12.05 - 12.20** Partial segmental thrombosis of the corpus cavernosum
P. Hoyerup, Herlev (DK)

**12.20 - 12.25** Questions and answers

**12.25 - 12.40** Duplication of urethra
Y.F. Rawashdeh, Aarhus (DK)

**12.40 - 12.45** Questions and answers
Specialty Session 4

13.00 - 13.45  General assembly

Green Area, Room 12 (Level 1)

The General Assembly (AGM) is open to all delegates. Only Full EAUN Members can vote.

Chair:  S. Terzoni, Milan (IT)

Board:  P. Allchorne, London (GB)
        S. Borg, Msida (MT)
        L. Drudge-Coates, London (GB), Past Chair
        L. Söderkvist, Stockholm (SE)
        C. Tillier, Amsterdam (NL)
        S. Vahr, Copenhagen (DK), Chair Elect
        J. Verkerk-Geelhoed, Nieuwegein (NL)
        G. Villa, Milan (IT)

13.00 - 13.45  EAUN in 2017, changes in the board and future activities

S. Terzoni, Milan (IT)

Agenda:
• Welcome by the chair
• Approval of the Minutes AGM 2017
• Voting changes in the Board
• The report of the chair with presentation of the achievements of 2017/2018
• Report ESUN & Guidelines activities
• Report Finances & Special Interest Groups & Scientific committee
• Call for Social Media Assistant / Nursing Professional
• Open forum (for proposals from the members, cards will be available at the EAUN booth)

Specialty Session 5

13.45 - 14.00  Award session

Green Area, Room 12 (Level 1)

Chair:  S. Terzoni, Milan (IT)

• First Prize for the Best EAUN Poster Presentation
• Second Prize for the Best EAUN Poster Presentation
• Third Prize for the Best EAUN Poster Presentation
• Prize for the Best EAUN Nursing Research Project
ESU Hands-on Training Courses

ESU/ERUS-EAUN Hands-on Training in Robotic simulation and communication

Yellow Area, Room 5 (Level 0)

Aims and objectives of this session
• Obtain an understanding of the role of the console surgeon and the first assistant
• Test and improve the psychomotor skills required in the console by performing various exercises and experience parts of a surgical procedure in the simulator.

Get a glimpse of what it is like being a console surgeon or a first assistant in robotic surgery and the importance of adequate communication in the operating room. This robotics simulator hands-on training course will provide training using simulators and communication exercises adjusted for high risk environment. Performing efficient robotic assisted surgery requires psychomotor skills, where cognitive functions and physical skills such as coordination and fine and precise movements of the robotic instruments are vital for a safe surgical procedure. This course will offer an opportunity to discover the challenges and difficulties encountered both in the console performing robotic surgery and for the first assistant by creating an imitative environment.

Target audience
Novice and experienced nurses and operating room nurses curious to learn more of the fundamentals of robotic surgery.

Monday, 19 March
HOT 55 13.00 – 16.00

Chair:  S.J. Borg, Msida (MT)
Tutors:  O. Frenkel, Airport City (IL)
        J-P. Henry, Heillecourt (FR)
        A. Berkley, Seattle (US)

Registration fee including 25% VAT
Nurses (members / non-members) €32.50
Leading Continence Research and Education

Call for Abstracts:
1 March - 3 April 2018

ADVANCED MALE URETHRAL CATHETERISATION COURSE

“Empowering Healthcare Professionals to provide safe urethral catheterisation”

COURSE OBJECTIVES

• To understand causes of difficult or failed urethral catheterisation
• To understand indications for using the UCD®
• To identify patients for specialist referral
• To gain hands-on UCD® experience

“This course is all about solving the medical emergency of difficult or failed urethral catheterisation, which in most cases happens in elderly men due to an enlarged prostate gland.”

AMUC WORKSHOP

Designed for Nurses already familiar with standard urethral catheterisation skills, who would like to expand to Advanced Male Urethral Catheterisation (AMUC) skills.

Part 1: Theoretical part
Saturday 17 March 2018

Part 2: Hands-on practice
Sunday 18 March 2018

Delegates become confident using the new Urethral Catheterisation Device (UCD®), which was developed specifically to manage difficult urethral catheterisation.

FREE REGISTRATION

Tickets available at:
Urethrotech booth in the EAUN Exhibition, Green Area, Level 0 (next to the stairs leading to EAUN Session rooms)
**Industry Session by URETHROTECH**

**Green Area, Room 12 (Level 1)**

*Chair: D.E. Andrich, London (GB)*

**Aims and objectives**
Designed for nurses and doctors already familiar with standard catheterisation skills, but who would like to expand their competence in Advanced Male Urethral Catheterisation (AMUC) skills to manage difficult male urethral catheterisation safely and independently.

This workshop exists of a theoretical and a practical part (see next page).
Industry Session by URETHROTECH

09.00 - 18.00  Advanced Male Urethral Catheterisation (AMUC) - Practical Part

Room 7 (in Bella Sky Hotel, to be accessed via Bella Center, Green Area, Level 0)

Chair:  D.E. Andrich, London (GB)

Aims and objectives of this session
• To understand the development and rationale behind the UCD®
• Gain confidence in managing difficult or failed male urethral catheterisation
• To be able to identify patients who need referral for specialist intervention
• To gain hands-on experience using the UCD®

On completion of the training you will receive an AMUC training certificate.

Available timeslots
09.00 - 09.45
10.00 - 10.45
11.00 - 11.45
12.00 - 12.45
13.00 - 13.45
14.00 - 14.45
15.00 - 15.45
16.00 - 16.45
17.00 - 17.45

Registration fee
Kindly note, for this workshop there is no separate registration fee.

Limited places available.
Before the congress please register by sending an e-mail to registrations@congressconsultants.com.
During the congress you can register at the Urethrotech Booth in the Green Area (Level 0).
