22nd International EAUN Meeting

www.eaun21.org

Abstract and Video Submission, Difficult Case Submission

Research Project Plan Submission

Deadline: 1 December 2020

in conjunction with

EAU21 | MILAN, ITALY
19-23 March 2021

eaun European
Association
of Urology
Nurses

Collaboration between nurses and doctors

Plenary Session 1

Friday 3 September
09:00 - 09:30

Location Virtual room 1

Chairs P. Allchorne, London (GB)
S. Vahr Lauridsen, Copenhagen (DK)

Learning objectives

Last year the congress could not take place due to the COVID-19 virus. This year the congress will also take place virtually due to continuing limitations in travelling and gathering in large groups. During this opening session we will reflect on the victims of COVID-19 under healthcare workers and patients. In this year's session we will discuss the collaboration between doctors and nurses as we have seen how important that is in times of crises for good and safe healthcare.

09:00 - 09:03

Welcome to the 21st International Meeting of the EAUN

S. Vahr Lauridsen, Copenhagen (DK)

Welcome

C.R. Chapple, Sheffield (GB)

09:03 - 09:04

1 minute of silence

09:04 - 09:11

Collaboration between nurses and doctors from a nurse's point of view

B. Thoft Jensen, Aarhus (DK)

09:11 - 09:18

Collaboration between nurses and doctors from a doctor's point of view

S.M. Haensel, Rotterdam (NL)

09:18 - 09:23

Discussion

09:23 - 09:28

Presentation of the Ronny Pieters Award

F. Geese, Berne (CH)

09:28 - 09:30

Closing remarks

Castration-resistant prostate cancer

Thematic Session 1

Friday 3 September
09:30 - 10:00

Location Virtual room 2
Chairs J. Alcorn, Wakefield (GB)
C.N. Tillier, Amsterdam (NL)

Learning objectives

Castrate-resistant prostate cancer represents the later stages of the disease and is characterised by disease progression despite androgen deprivation therapy. The uro-oncology multidisciplinary team consists of experts from urology, uro-oncology, radiation-oncology, pathology, nuclear medicine and radiology to discuss the most favourable treatments based on the best available evidence. In this session, we will learn both the urologist and nursing perspectives on castrate-resistant prostate cancer. The role of the PMSA scan, and treatment with lutetium prostate specific membrane antigen therapy will be presented.

09:30 - 09:31

Introduction
C.N. Tillier, Amsterdam (NL)

09:31 - 09:38

Urologist perspective
N. Fossati, Milan (IT)

09:38 - 09:45

**Prostate-Specific Membrane Antigen (PSMA) scan, PSMA lutetium treatment/
radium treatment**
J.M. Lavalaye, Nieuwegein (NL)

09:45 - 09:52

Nurse perspective
N. Klok, Enschede (NL)

09:52 - 10:00

Discussion and closing remarks

Prostate Cancer Special Interest Group: Addressing skeletal issues in metastatic prostate cancer - a multi-professional concern

Thematic Session 2

Friday 3 September
10:00 - 10:40

Location Virtual room 1
Chairs H.A.M. Van Muilekom, Leiden (NL)
B.R. Villumsen, Holstebro (DK)

Learning objectives

Although a higher percentage of men have localised disease at presentation, metastatic prostate cancer remains an important clinical problem. In terms of the number of men with advanced disease and its impact on quality of life, and as a cause of mortality. Osteoblastic lesions in bone are the most common site of metastasis. These frequently are symptomatic and can cause pain, debility, and functional impairment. The treatment of bone metastases in men with prostate cancer is palliative. The goals of treatment are to improve survival, relieve pain, improve mobility, and prevent complications. These approaches will be discussed in this session as well as the necessity for a multi-professional approach.

10:00 - 10:01	Introduction H.A.M. Van Muilekom, Leiden (NL)
10:01 - 10:08	Back to basics – biology and patient assessment H.A.M. Van Muilekom, Leiden (NL)
10:08 - 10:15	Evidence for bone-targeted approaches B. Tombal, Brussels (BE)
10:15 - 10:22	Safety, feasibility and efficacy of exercise for individuals with bone metastases K. Bolam Enarsson, Solna (SE)
10:22 - 10:29	Symptom control and the use of palliative radiotherapy P.H. Reynolds, Manchester (GB)
10:29 - 10:40	Discussion and closing remarks

Nursing solutions in difficult cases

Specialty Session 1

Friday 3 September
10:40 - 11:05

Location Virtual room 2

Chairs P. Allchorne, London (GB)
J.T. Marley, Portadown (GB)

The submitted cases have been evaluated by an expert jury:

- Helen Forristal, Dublin, Ireland (Urology Nurse)
- Françoise Picard, Bordeaux, France (Head Nurse Urology Department)
- Ronny Pieters, Ghent, Belgium (Urology Nurse)
- Eva Wallace, Dublin, Ireland (Urology Nurse)
- Steven Walter, Odense, Denmark (Professor in Urology)

Learning objectives

In guidelines it is common practice to describe and focus on typical cases, but we all know that there is also a need for information on nursing practice in atypical (difficult) cases. All nurses encounter problems in daily nursing practice and have found their own solutions or, sometimes, have not found a solution. In this session these challenging cases are presented and discussed, offering delegates a unique opportunity to learn from each other's experience.

10:40 - 10:41

Introduction

P. Allchorne, London (GB)

10:41 - 10:44

Clean intermittent self-catheterisation in an older patient with cystocele grade 3

V. Decalf, Ghent (BE)

10:44 - 10:49

Discussion

10:49 - 10:52

Scrotal Swelling as complication of Glomerulonephritis

Z. Sutria, Karachi (PK)

10:52 - 10:57

Discussion

10:57 - 11:00

A quality-of-life issue.... when self-intermittent catheterization becomes a challenge

C. Ahern, Dublin (IE)

11:00 - 11:05

Discussion

Endourology Special Interest Group: Endourology today - diagnostics, treatment modalities and minimally-invasive surgical advancements

Thematic Session 3

Friday 3 September
11:05 - 11:35

Location

Virtual room 1

Chairs

J. Verkerk-Geelhoed, Nieuwegein (NL)
H. Omana, London (GB)

Learning objectives

Stone disease: To gain an in-depth understanding on the diagnosis and disease process in the formation of kidney stones, risks factors and prevention. To have an update on the current guidelines and emerging technological advancements for stone disease. And explore the role and impact of endourology nurses.

BPH: To have an understanding on the diagnosis and disease process of BPH, risk factors as well as the current guidelines and the latest technological advancements. To explore the role of the endourology nurses and how we can improve our practice in the diagnosis and treatment of BPH.

Robotics and beyond: Detailed information on the various robotics procedures and how it changed the urological world. To have a comprehensive discussion on how (MIS) the robot can 'push the boundaries' in dealing with complex and more demanding cases. To explore the significance of an experienced Robotic Surgical Care Practitioner in the success of each robotic procedure and in the improvement in theatre efficiency.

11:05 - 11:06

Introduction

H. Omana, London (GB)

11:06 - 11:13

Stone disease

A. Skolarikos, Athens (GR)

11:13 - 11:20

Benign prostatic hyperplasia

R. Nair, London (GB)

11:20 - 11:27

Robotics and beyond

A. Mohammed, London (GB)

11:27 - 11:35

Discussion and closing remarks

Nocturia in children and adults

Thematic Session 4

Friday 3 September
11:35 - 12:05

Location Virtual room 2

Chairs H. Cobussen-Boekhorst, Nijmegen (NL)
E. Wallace, Dublin (IE)

Learning objectives

Enuresis is more common among children and nocturia is more common in middle-aged and older adults. Both have a profound impact on the quality of life. Do we know the predictive factors? How can we manage (medical and non medical management)?

11:35 - 11:36

Introduction

H. Cobussen-Boekhorst, Nijmegen (NL)

11:36 - 11:43

Physiology and pathophysiology

G. Bogaert, Leuven (BE)

11:43 - 11:50

Nocturia: Types and differences in definitions in children and adults

L. Boyce, Dublin (IE)

11:50 - 11:57

Nocturia: Predictive factors and management

G. Bogaert, Leuven (BE)

11:57 - 12:05

Discussion and closing remarks

Bladder Cancer Special Interest Group: The ideal cystectomy pathway

Thematic Session 5

Friday 3 September
12:05 - 12:35

Location Virtual room 1

Chairs K. Chatterton, London (GB)
A. Semedo, London (GB)

Learning objectives

This session will set the scene for initiating or improving your ideal cystectomy pathway, considering the challenges and dilemmas of setting up a prehabilitation clinic. Also you will learn how to involve ward and inpatient services in the implementation of enhanced recovery programmes throughout the service, as well as improve pre-assessments, patient care and experience during the cystectomy patient's journey pre and post operatively.

12:05 - 12:06

Introduction

K. Chatterton, London (GB)

12:06 - 12:13

Pre-assessment and optimising patient care and experience

C. Scheede-Bergdahl, Montreal (CA)

12:13 - 12:20

Setting up a prehab clinic in practical terms

N. Love-Retinger, New York (US)

12:20 - 12:27

Symptom management in post-surgical recovery in the ERAS pathway

S. Vahr Lauridsen, Copenhagen (DK)

12:27 - 12:35

Discussion and closing remarks

Overcoming challenges in non-muscle invasive bladder cancer care

Thematic Session 6

Friday 3 September
13:30 - 14:00

Location Virtual room 1

Chairs R. McConkey, Galway (IE)
T. Santos, Lisbon (PT)

Learning objectives

Non muscle invasive bladder cancer is a common, heterogenous disease with limited treatment options. It is associated with high rates of recurrence, is expensive to treat and leads to high patient physical and psychosocial burden and often results in lifelong invasive follow up. This session will explore the landscape of current clinical trials and consider the evidence for treatments that may emerge to manage this disease in the future. BCG remains the gold standard for intermediate-high risk disease, however BCG toxicity can result in side effects ranging from mild to severe and be local or systemic. BCG shortages and strategies to manage its impact are presented. The consequences of side effects which can impact negatively on patient's quality of life are examined and the role of a dedicated bladder cancer patient support group is described.

13:30 - 13:31

Introduction

T. Santos, Lisbon (PT)

13:31 - 13:37

What might NMIBC treatment look like in the next decade - current trials and latest evidence on emerging treatments

A.M. Kamat, Houston (US)

13:37 - 13:43

Where are we with Bacillus Calmette–Guérin (BCG)? Shortages, efficacy, safety and practicalities of dose reduction, and alternative treatments

K. Chatterton, London (GB)

13:43 - 13:49

BCG side effects and quality of life

J. Alcorn, Wakefield (GB)

13:49 - 13:55

The role of dedicated bladder cancer patient support and the launch of the World Bladder Cancer Patient Coalition

L. Makaroff, Chinnor (GB)

13:55 - 14:00

Discussion and closing remarks

The role of clinical experience in the update of the EAUN Guidelines on indwelling catheterisation

State-of-the-art Lecture 1

Friday 3 September
14:00 - 14:20

Location

Virtual room 2

Chairs

V. Geng, Lobbach (DE)

S. Vahr Lauridsen, Copenhagen (DK)

Learning objectives

During this session the update of the guideline on indwelling catheters by the EAUN will be presented. The latest literature has been studied. Undecided subjects are discussed by an expert group of urology nurses throughout Europe. The results of the literature search and expert group opinion will be presented.

14:00 - 14:02

Introduction

S. Vahr Lauridsen, Copenhagen (DK)

14:02 - 14:10

Indwelling catheterisation guidelines update - what evidence is available and what is the role of clinical experience

V. Geng, Lobbach (DE)

14:10 - 14:20

Discussion and closing remarks

The impact of COVID-19 on the delivery of urological care

Specialty Session 2

Friday 3 September
14:20 - 14:50

Location Virtual room 1

Chairs P. Allchorne, London (GB)
A. Semedo, London (GB)

Learning objectives

The last year the COVID-19 pandemic has hit the world and Europe hard. Therefore we want to dedicate this session to the urological aspects and consequences of the COVID-19 pandemic. In this session you will learn about the management of the urological team, the rehabilitation of the patients and the quality of life in urological care and the end of life care in COVID-19 patients with urological issues.

14:20 - 14:21

Introduction

A. Semedo, London (GB)

14:21 - 14:28

Impact of COVID-19 on urological services from a global perspective

Y.C.J. Teoh, Hong Kong (CN)

14:28 - 14:35

Ensuring robust specialist nursing support for patients during the COVID-19 pandemic

R. Martin, London (GB)

14:35 - 14:42

Patient counselling and informed consent of urological surgery patients during COVID-19

E.Y.E. Desouky, Slough (GB)

14:42 - 14:50

Discussion and closing remarks

Nursing Research Competition

Specialty Session 3

Friday 3 September
14:50 - 15:15

Location Virtual room 2

Chairs F. Geese, Berne (CH)
R. Pieters, Ghent (BE)

Judges S. Vahr Lauridsen, Copenhagen (DK)
V. Geng, Lobbach (DE)
J.T. Marley, Newtownabbey (GB)
R.C.N. Van Den Bergh, Nieuwegein (NL)
H. Van Melick, De Bilt (NL)

Learning objectives

The aim of the nursing research competition is to give nurses the chance to start research in the field of urology nursing. The audience is presented the research plans as they are being discussed by a jury, so this session also becomes an interactive learning session for pitfalls and opportunities in setting up nursing research.

The winner of the Best EAUN Nursing Research Project 2021 will be announced and will receive € 2,500 to start his or her research project + certificate in the Award Session on Saturday, 4 September, 13:45 hrs

14:50 - 14:51

Introduction
R. Pieters, Ghent (BE)

14:51 - 14:55

Report from the research competition winner of 2018: Prevalence, incidence and associated factors of nocturia on the ward
V. Decalf, Ghent (BE)

14:55 - 14:57

Discussion

14:57 - 15:01

Enhanced Recovery After Surgery (ERAS) for patients undergoing radical cystectomy
S. Chagani, Karachi (PK)

15:01 - 15:03

Discussion

15:03 - 15:07

To identify both the patient experience of having intravesical Botulinum toxin A under local anesthetic in a rehabilitation setting and quality of life post treatment, in individuals with a spinal cord injury.
C. Ahern, Dublin (IE)

15:07 - 15:09

Discussion

15:09 - 15:14

Roles, Experiences and Views of the Operating Room Nurses in Robotic Surgery: Mix Method Study
S. Şenol Çelik, Istanbul (TR)

15:14 - 15:15

Closing remarks

The burden of a curved penis, everything you want to know about Peyronie's disease

ESU Course

Friday 3 September
15:30 - 17:30

Location Virtual room 1

Chair M. Albersen, Leuven (BE)

Learning objectives

Urology nurses and urology nurse specialists frequently encounter patients with penile reconstructive surgery for curvature and penile implants.

Patients suffering from Peyronie's disease often have high expectations from the treating team and it is of paramount importance to align these expectations with the reality of outcomes of this type of surgery.

In this course, we will provide an overview of surgical and non-surgical options in Peyronie's disease as well as highlight attention points in patient care and counselling throughout the spectrum of the disease.

15:30 - 15:45

Pathophysiology, natural history and rationale for conservative therapy in Peyronie's disease

M. Albersen, Leuven (BE)

15:45 - 16:00

Diagnostic evaluation of the patient and partner

V. Modgil, Manchester (GB)

16:00 - 16:20

Pre-surgical counselling of the patient and partner

J. Verkerk-Geelhoed, Nieuwegein (NL)

16:20 - 16:30

Break

16:30 - 16:45

Surgical options for Peyronie's disease: plication and grafting

V. Modgil, Manchester (GB)

16:45 - 17:00

Surgical options for Peyronie's disease: Penile prosthesis

M. Albersen, Leuven (BE)

17:00 - 17:15

Post-surgical guidance and rehabilitation

J. Verkerk-Geelhoed, Gouderak (NL)

17:15 - 17:30

Discussion and closing remarks

(Almost) everything about kidney function

Thematic Session 7

**Saturday 4
September
09:00 - 09:30**

Location Virtual room 1
Chairs A. Semedo, London (GB)
C.N. Tillier, Amsterdam (NL)

Learning objectives

This session is focused on the basics of urology nursing in renal diseases. The urology nurse should know when and why a blood sample or urine test is necessary to detect abnormalities and how to interpret them. In this session you will learn which disease the patient has, based on the blood test or urine sample and how it should be treated.

09:00 - 09:01

Introduction
C.N. Tillier, Amsterdam (NL)

09:01 - 09:08

Complexity of renal function (general kidney function)
F. Farag, Ipswich (GB)

09:08 - 09:15

Kidney function: Blood test
N. Grivas, Ioannina (GR)

09:15 - 09:22

Kidney function: Urine test
N. Kalampokis, Greece (GR)

09:22 - 09:30

Discussion and closing remarks

An update on the Educational Framework for Urological Nursing (EFUN) (Curriculum) and the role of the Advanced Nurse Practitioner (ANP)

Plenary Session 2

**Saturday 4
September
09:30 - 10:00**

Location

Virtual room 2

Chairs

J.T. Marley, Portadown (GB)

J. Taylor, Salford (GB)

Learning objectives

The delegates will be updated on the development of the international educational framework that BAUN, EAUN, and ANZUNS have been working on in recent years. You will also learn more on the role of the ANP/nurse specialist in Switzerland and how has this role developed over the last two decades.

09:30 - 09:31

Introduction

J. Taylor, Salford (GB)

09:31 - 09:41

The Educational Framework for Urological Nursing (EFUN)

J.T. Marley, Newtownabbey (GB)

09:41 - 09:46

Discussion

09:46 - 09:54

The development of the role of the ANP in Europe

F. Geese, Berne (CH)

09:54 - 10:00

Discussion and closing remarks

Continenence Special Interest Group: New strategies for promoting patient education in urology

Thematic Session 8

Saturday 4
September
10:00 - 10:30

Location

Virtual room 1

Chairs

V. Lejay, Creteil (FR)
E. Wallace, Dublin (IE)

Learning objectives

Good communication and education is essential for the successful outcome of individualised nursing care of each patient. To achieve this, however, nurses must understand and help their patients, demonstrating courtesy, kindness and sincerity. Also they should devote time to the patient to communicate with the necessary confidentiality, and must not forget that this communication includes persons who surround the sick person, which is why the art of communication should be understood by all those involved in it. This session aims to support nurses in educating their patients by giving them practical examples on different educational techniques and programmes, e.g. suprapubic catheter, continence, etc.

10:00 - 10:01

Introduction

E. Wallace, Dublin (IE)

10:01 - 10:08

The lived experience of people with urinary catheter

G. Villa, Milan (IT)

10:08 - 10:15

Education in suprapubic catheter change: A 3D animation

E. Wallace, Dublin (IE)

10:15 - 10:22

Urinary Tract Infection (UTI) prevention in intermittent catheterisation: Guidelines and education

V. Geng, Lobbach (DE)

10:22 - 10:30

Discussion and closing remarks

Abstract presentations

Abstract Session 1

**Saturday 4
September
10:30 - 11:30**

Location Virtual room 2

Chairs H. Cobussen-Boekhorst, Nijmegen (NL)
J. Verkerk-Geelhoed, Nieuwegein (NL)

We encourage you to view the abstracts prior to the session:

- On 3 August abstract bodies will be available in the EAUN21 Resource Centre.

All presentations have a maximum length of 3 minutes, followed by 1 minute of live discussion

Learning objectives

In this abstract session, delegates will have the opportunity to hear from their peers as they disseminate their research findings, audit results, and share service improvements and practice developments. Monetary prizes will be awarded for the best scientific and practice-orientated abstracts at the award ceremony near the end of the meeting.

10:30 - 10:32

Introduction

P01

Digital fluid balance monitoring can improve measurement accuracy. A pilot study
L. Leinum, Nykoebing Falster (DK)

P02

Prostate cancer patients' perspectives of integrating mHealth and coaching in prostate cancer survivorship care
L. Faurholt Øbro, Fredericia (DK)

P03

Patient' experiences of pain and discomfort during treatment of small lesions assisted by Blue Light Flexible Cystoscopy in local anesthesia: Preliminary results from a multicenter, mixed methods study
L. Faurholt Øbro, Fredericia (DK)

P04

Assessment of bladder cancer patients' mental wellbeing needs as part of the Graham Roberts Study at Guy's Cancer Centre
A. Bessa, Cambridge (GB)

P05

The uptake of sexual wellbeing support by bladder cancer patients: A retrospective patients review
A. Bessa, Cambridge (GB)

P06

Post-void residual volume after uroflowmetry measured using both ultrasound and bladder scanner by urologic nurses
G. Maiolino, Perugia (IT)

P07

The uptake of physical activity by bladder cancer patients as part of a referral pathway
A. Bessa, Cambridge (GB)

P08

A comparison of job satisfaction, depression severity and quality of life between perioperative nurses who take part robot-assisted laparoscopic and pure laparoscopic surgery
D.N. Turgut, Ankara (TR)

Scientific Programme - EAUN21 Virtual

P09	Re-thinking focus of care - A qualitative study investigating emotional and communicative needs of men before and after radical prostatectomy from a urotherapy perspective J. Elliott, Münster (DE)
P10	Cost effectiveness and oncological outcomes of local anaesthetic cystodiathermy of bladder tumour and feasibility of urology specialist nurse in performing this procedure D. Lohana, Dundee (GB)
P11	Assessment of functional impairment and cognitive status in patients undergoing radical cystectomy: Correlation between Barthel Index and perioperative outcomes
P12	Freedom from urethral catheterisation – using QI methodology to improve patient outcome and experiences M. Parker, London (GB)
P14	Impact of a decision support systems on decision self-efficacy in patients considering transrectal ultrasound-guided prostate biopsy
11:28 - 11:30	Conclusion & implication for nursing research/practice

Combined abstract and video presentations

Abstract Session 2

**Saturday 4
September
11:30 - 12:10**

Location Virtual room 1

Chairs R. McConkey, Galway (IE)
T. Santos, Lisbon (PT)

We encourage you to view the abstracts prior to the session:

- On 3 August abstract bodies will be available in the EAUN21 Resource Centre.

All poster presentations have a maximum length of 3 minutes, followed by 1 minute of live discussion

The video presentation has a maximum length of 9 minutes, followed by 1 minute of live discussion

Learning objectives

In this abstract session, delegates will have the opportunity to hear from their peers as they disseminate their research findings, audit results, and share service improvements and practice developments. Monetary prizes will be awarded for the best scientific and practice-orientated abstracts at the award ceremony near the end of the meeting.

This session's abstracts (incl. 1 video) were accepted for presentation at EAUN20 and resubmitted this year.

11:30 - 11:32

Introduction

P15

The power of words - patients' experiences of urology day case surgery in local anesthesia

L. Faurholt Øbro, Fredericia (DK)

P16

Ultrasonography and bladder volume accuracy: A comparative study using two portable bladder scanners and a 3D ultrasound system

C. Ahern, Dublin (IE)

P17

The efficacy of decision support E-Book for reducing decisional conflict on prostate biopsy in patients with elevated serum prostate-specific antigen

P18

Acute urinary retention: What's next?

J.M. Bergman, Alkmaar (NL)

P19

The SedUROscopy Project: Sedation by nursing supervised by the anesthetist at the lithotripsy and endourology unit

T. Cabello, Paterna (ES)

P20

Evaluation of a nurse-led telephone triage service and its impact on achieving the best practice pathway for prostate cancer in England

C. Waymont, Stafford (GB)

V01

Patient procedures portal: Video clinical tutorials empower patients to self care

R. Martin, London (GB)

12:06 - 12:10

Conclusion & implication for nursing research/practice

Nurse-led management of male Lower Urinary Tract Symptoms (LUTS)

State-of-the-art Lecture 2

**Saturday 4
September
12:10 - 12:25**

Location Virtual room 2
Chairs R. McConkey, Galway (IE)
T. Santos, Lisbon (PT)

Learning objectives

Nurse-led urology clinics are beneficial by improving access to specialist care. This presentation provides an overview of a nurse-led male LUTS clinic in Ireland and outlines the national and international guidelines and pathways that influence clinical governance. Nurse-led male LUTS assessment tools will be discussed and the role of pharmacological interventions for male LUTS will be outlined. The role of nurse-led virtual clinics in the management of male LUTS will be presented.

12:10 - 12:11

Introduction
R. McConkey, Galway (IE)

12:11 - 12:21

Nurse-led assessment and management of male non-neurogenic LUTS
T. Kelly, Galway (IE)

12:21 - 12:25

Discussion and closing remarks

Improving quality of care: Getting It Right First Time (GIRFT)

State-of-the-art Lecture 3

**Saturday 4
September
12:25 - 12:40**

Location Virtual room 1

Chairs J. Alcorn, Wakefield (GB)
J. Taylor, Salford (GB)

Learning objectives

In the UK the "House of Lords Select Committee" report of April, 2017, posed that the biggest internal threat to the sustainability of the National Health Service (NHS) is the lack of a long-term strategy to secure an appropriately skilled, well-trained and committed workforce.

The aim of this session is to highlight the key findings and show that there is significant scope to improve the care delivered to our patients.

12:25 - 12:26

Introduction to GIRFT - what, why and when

J. Alcorn, Wakefield (GB)

12:26 - 12:36

GIRFT in urology

J. McGrath, Exeter (GB)

12:36 - 12:40

Discussion and closing remarks

The intersection of urology and sexuality

State-of-the-art Lecture 4

**Saturday 4
September
12:40 - 12:55**

Location Virtual room 2
Chairs R. McConkey, Galway (IE)
J. Verkerk-Geelhoed, Nieuwegein (NL)

Learning objectives

Men's sexual health is impacted by prostate cancer treatment. This presentation will provide an insight into the impact of erectile dysfunction in patients treated for prostate cancer. Developing a nurse-led clinic for managing erectile dysfunction is presented. The treatment options including a nurse led Alprostadil (Caverject) clinic is outlined, and the patient follow-up process will be discussed.

12:40 - 12:41

Introduction
R. McConkey, Galway (IE)

12:41 - 12:51

Managing the sexual side effects of prostate cancer treatment
G. O'Boyle, Galway (IE)

12:51 - 12:55

Discussion and closing remarks

Holistic approach to urinary and bowel continence care

Thematic Session 9

**Saturday 4
September
13:30 - 14:00**

Location Virtual room 1

Chairs H. Cobussen-Boekhorst, Nijmegen (NL)
J. Verkerk-Geelhoed, Nieuwegein (NL)

Learning objectives

This session will present the latest updates on the promotion of holistic assessment and management of urinary and bowel continence care, and addresses how it will support academic development and excellence in daily continence care practice.

13:30 - 13:31

Introduction

S. Terzoni, Milan (IT)

13:31 - 13:38

Promoting excellence in continence care

V. Geng, Lobbach (DE)

13:38 - 13:45

From continence nurse to patient expert in Cauda Equina Syndrome (CES)

M. Kauwenberg-Middeljans, Veldhoven (NL)

13:45 - 13:52

Difficult case

H. Cobussen-Boekhorst, Nijmegen (NL)

13:52 - 14:00

Discussion and closing remarks

Palliative and end of life care in urology - teamwork

Thematic Session 10

**Saturday 4
September
14:00 - 14:30**

Location Virtual room 2

Chairs P. Allchorne, London (GB)
A. Semedo, London (GB)

Learning objectives

This session aims to give insight in the palliative care within urology from the medical and nurse's perspective. The SENS model in the interdisciplinary collaboration will be discussed. In the oncological urological care opiates are often used and addiction can be a problem. How can you cope with this?

14:00 - 14:01

Introduction

A. Semedo, London (GB)

14:01 - 14:08

Palliative care - medical perspective

J. Green, London (GB)

14:08 - 14:15

SENS model in interdisciplinary cooperation in palliative situations

M. Fliedner, Berne (CH)

14:15 - 14:22

Case presentation: Using the SENS model in urological care

R. Willener, Berne (CH)

14:22 - 14:30

Discussion and closing remarks

P. Allchorne, London (GB)

Award Session

Specialty Session 4

**Saturday 4
September
14:30 - 14:50**

Location Virtual room 1

Chairs S. Vahr Lauridsen, Copenhagen (DK)
R. McConkey, Galway (IE)
