EAU22 | AMSTERDAM
1-4 July 2022
# Urology care through a pandemic, lessons (to be) learned

## Plenary Session 1

**Saturday 2 July**  
**09:00 - 10:15**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
</table>
| 09:00 - 09:05 | Welcome to the 22nd International Meeting of the EAUN  
                          P. Allchorne, London (GB) |
| 09:05 - 09:10 | Welcome to Amsterdam  
                          C.R. Chapple, Sheffield (GB) |
| 09:10 - 09:15 | Welcome by the V&VN, the association of urology nurses of the Netherlands  
                          J. Verkerk-Geelhoed, Nieuwegein (NL) |
| 09:15 - 09:30 | Modifying urology care in a pandemic  
                          F. Porpiglia, Turin (IT) |
| 09:30 - 09:45 | Patients' experiences of cancer care in COVID-19  
                          M. Dowling, Galway (IE) |
| 09:45 - 10:00 | The COVID pandemic, the EAU response and impact on patients and health care professionals  
                          C.R. Chapple, Sheffield (GB) |
| 10:00 - 10:05 | Presentation Ronny Pieters Award  
                          R. Pieters, Ghent (BE) |
| 10:05 - 10:15 | Discussion and closing remarks |

**Location**  
Yellow Area, Room E102

**Chair**  
P. Allchorne, London (GB)

**Learning objectives**

This session looks at ways the pandemic has changed the delivery of urological healthcare. It will also delve into the impact the pandemic has had on patients undergoing cancer care and finally will look at strategies nurses can employ to build resilience and protect themselves from the mental strain it has caused.
# Treatment of prostate cancer

<td>Discussion and closing remarks</td>
<td></td>
</tr>
</tbody>
</table>

**Location**  
Yellow Area, Room E103

**Chair**  
V. Geng, Lobbach (DE)

**Learning objectives**
The aim of this session is to give an overview of the current knowledge about risk factors associated with CAUTI and its impact on everyday life in patients with an indwelling catheter or patients using an intermittent catheter. This will create awareness of the importance of adherence to guidelines to prevent further antimicrobial resistance.
Learning objectives
The overactive and underactive bladder is a 'benign' bladder condition, affecting adults of all ages, and is a symptom syndrome that can be complex and difficult to diagnose. UAB can be multifactorial as it may overlap with other co-existing urological conditions such as bladder outlet obstruction and overactive bladder. These conditions can have a significant impact on quality of life. In this session UAB and OAB will be related to neurological diseases like Parkinson, MS, SCI. The aim of this session will be to provide an overview of the condition, to help urology nurses recognise the signs and symptoms of UAB and OAB, with an update on the current assessment and management and guidance of patients.

11:45 - 11:50
Introduction
J. Ellis-Jones, Bristol (GB)

11:50 - 12:15
Symptoms, diagnosis and treatment options for Underactive or Overactive bladder (neurogenic detrosor diorder) in patients with neurological disease
H. Madersbacher, Innsbruck (AT)

12:15 - 12:35
Management of the patient with bladder storage or outlet problems in neurological disease
E. Wallace, Dublin (IE)

12:35 - 12:45
Discussion & Closing remarks
Nursing solutions in difficult cases
Specialty Session 1
Saturday 2 July
11:45 - 12:20

**Location** Yellow Area, Room E103

**Chair** V. Geng, Lobbach (DE)

**Learning objectives**
In guidelines it is common practice to describe/focus on typical cases, but we all know that there is also a need for information on nursing practice in atypical (difficult) cases. All nurses encounter problems in daily nursing practice and have found their own solutions or, sometimes, have not found a solution. In this session these challenging cases are presented and discussed, offering delegates a unique opportunity to learn from each other’s experience.

The submitted cases have been evaluated by an expert jury:

- Ronny Pieters, Ghent, Belgium (Urology Nurse)
- Eva Wallace, Dublin, Ireland (Urology Nurse)
- Rita Willener, Berne, Switzerland (Urology Nurse)
- Doris Kisslig, Berne, Switzerland (CNS in Urology)
- Netty Kinsella, United Kingdom (Urology Nurse Consultant)

11:45 - 11:47
**Introduction**
V. Geng, Lobbach (DE)

11:47 - 11:57
**Prevention of complications following accidental catheter balloon injury during bladder catheterisation**
M.J. Abitang, Dublin 9 (IE)

11:57 - 12:07
**Innovation in management and approach to nursing care in bilateral inguinal lymphadenectomy due to penile tumour**
M.T. Alonso Torres, Barcelona (ES)

12:07 - 12:17
**Leydig cell tumour – A patient journey**
T. Conroy, Meath (IE)

12:17 - 12:20
**Discussion and closure**
Overcoming obstacles in patient communication
Thematic Session 4

Saturday 2 July
14:30 - 15:30

Location: Yellow Area, Room E102
Chair: C.N. Tillier, Amsterdam (NL)

Learning objectives
Shared decision making (SDM) in urological cancer is meant to help patients make the best treatment choice for them. Patients receive information from the internet, health care providers (urologists or nurses), flyers, SDM tools, and other sources. However, we do not know how well the information is understood, nor do we know if all the tools we use work for all patients. And do we communicate properly with each individual patient in order to help her/him to make a balanced decision? This session will try to answer to all these questions.

14:30 - 14:35
Introduction
C.N. Tillier, Amsterdam (NL)

14:35 - 14:50
Finding ways to optimally inform patients with lacking digital or literacy skill
M.R. Van Balken, Arnhem (NL)

14:50 - 15:05
Shared decision making in localised prostate cancer: information given by clinician vs. information understood by patients
R.D. Vromans, Tilburg (NL)

15:05 - 15:20
Are functional urology decision aids effective to make information understandable for patients?
F.W.M. Schlatmann, Arnhem (NL)

15:20 - 15:30
Discussion and closing remarks
Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

Poster Session 2

Sunday 3 July
11:45 - 13:30

Location: Yellow Area, Room E103

Chairs: T. Santos, Lisbon (PT)
        J. Ellis-Jones, Bristol (GB)

Judges: S.C. Hillery, York (GB)
        J. Alcorn, Wakefield (GB)
        F. Geese, Berne (CH)

Poster viewing of 30 minutes. Short introduction of 1 minute by the chair of the session. Presentations will take place on stage. Standard presentations are 6 minutes in length, followed by 2 minutes for discussion. Closing remarks of 2 minutes by the chair of the session.

11:45 - 12:15
Poster viewing

12:15 - 12:16
Introduction

P10 Perspectives of patients with prostate cancer on self-management support through mHealth and health-coaching
L. Faurholt Øbro, Vejle (DK)

P11 Better together: Family participation after radical cystectomy

P12 ProsCAp mobile application helps improve the quality of supportive care in patients with prostate cancer
H.A.M. Van Muilekom, Amsterdam (NL)

P13 The experience of urostomy patients: A literature review
G. Villa, Milan (IT)

P14 Migration of an established pre-operative education session for robot-assisted radical prostatectomy patients to telehealth – a quality improvement initiative
M. Diocera, Melbourne (AU)

P15 The establishment of a standardized patient involving PRO-intervention for patients with prostate cancer treated with Active surveillance
L.D. Ostergaard, Odense C (DK)

P16 COVID changed everything: Implementing a nurse-led transperineal prostate biopsy service safely in outpatients during the pandemic

P17 Improving bladder cancer care during COVID-19: Using technology and necessity to support patients in novel ways
J. Codling, London (GB)

P18 Knowledge sharing: A practice-development initiative to improve rehabilitation in prostate cancer patients
B.R. Villumsen, Herning (DK)

13:28 - 13:30
Closing remarks
# Nurse-led clinics in benign urology

State-of-the-art Lecture 1

<table>

| 16:10 - 16:15 | Discussion and closing remarks |
Joint session of the EAUN and the V&VN Urology (NL): The role of the uro-oncology nurse at the outpatient clinic

Thematic Session 5

Saturday 2 July
16:30 - 17:30

Location
Yellow Area, Room E102

Chair
J. Verkerk-Geelhoed, Nieuwegein (NL)

Learning objectives
In the Netherlands there is a culture of regulations in healthcare. Within oncology the "SONCOS guidelines" are leading in the way care around an oncology patient is organised. The role of the uro-oncology nurse is also regulated in the "SONCOS guidelines". We will discuss how this is regulated, if this contributes to good clinical care and what the importance is of the role of the uro-oncology nurse in the care pathway of a prostate cancer patient during his treatment in the Netherlands.

16:30 - 16:35
Introduction
J. Verkerk-Geelhoed, Nieuwegein (NL)

16:35 - 16:50
The nursing role in Dutch uro-oncology with regard to implementation of the ERAS-protocol in the treatment of renal cell carcinoma
N. Klok, Enschede (NL)

16:50 - 17:05
Patient guidance by a uro-oncology nurse during treatment for prostate cancer
H.A.M. Van Muilekom, Leiden (NL)

17:05 - 17:20
Example of the role of the urology advanced nurse practitioner in care pathway non-muscle-invasive bladder cancer
R. McConkey, Galway (IE)

17:20 - 17:30
Discussion and closing remarks
### Learning objectives

Although incontinence is not a life-threatening illness, loss of bladder control can affect the social, psychological, family, occupational, physical and sexual aspects of patients’ lives. Urinary incontinence leads to reduced quality of life, social isolation and restricted lifestyles. Therefore, it is important to study this issue in order to understand the phenomenon and its characteristics, the experience of people and the contribution of health care professionals.

## Learning objectives

It is known that one third of cancers could be avoided by changing lifestyle or by modifying the environment in which we are living. Preventing cancer would not only have an impact on the individual health but also on the economy (cancer care is expensive). Studies have shown that it is never too late to change our habits in order to prevent cancer. Nurses can play an important role in giving information and motivating patients to help them adapt their lifestyle. Some risk factors such as smoking in bladder and kidney cancer are well known. Other risk factors are less known. Prevention of prostate cancer remains controversial. This session will highlight the prevention of urological cancers and will help nurses to provide primary prevention information and tools and to educate patients already diagnosed with cancer.
Prostate biopsy: Changing times and roles
Thematic Session 7

Sunday 3 July
09:45 - 10:45

Location
Yellow Area, Room E102

Chairs
C.N. Tillier, Amsterdam (NL)
H. Reinders-Huisman, Groningen (NL)

Learning objectives
To shed light on the latest developments in the procedure of prostate biopsies and the role that nurse practitioners/advanced nurses can play in this field. The panel discussion is meant to elaborate on the pros and cons of the different procedures (transrectal and transperineal).

09:45 - 09:47
Introduction
C.N. Tillier, Amsterdam (NL)

09:47 - 10:07
Who is performing the prostate biopsies: Urologists or nurse practitioners? Developments and a practical example
J.E. Kinsella, London (GB)

10:07 - 10:27
Comparison between transrectal and transperineal biopsies: Procedures, side effects and costs
R.C.N. Van Den Bergh, Nieuwegein (NL)

10:27 - 10:42
Panel discussion: Transrectal biopsies: should this procedure stay or be replaced by transperineal?
Discussants
T. Santos, Lisbon (PT)
J.E. Kinsella, London (GB)
R.C.N. Van Den Bergh, Nieuwegein (NL)

10:42 - 10:45
Closing remarks
Nursing research competition
Specialty Session 2

Location  
Yellow Area, Room E103

Chair  
R. Pieters, Ghent (BE)

Judges  
S. Vahr Lauridsen, Copenhagen (DK)  
V. Geng, Lobbach (DE)  
J.T. Marley, Newtownabbey (GB)  
B. Thoft Jensen, Aarhus (DK)

Learning objectives
The aim of the nursing research competition is to give nurses the chance to start research in the field of urology nursing. The audience is presented the research plans as they are being discussed by a jury, so this session also becomes an interactive learning session for pitfalls and opportunities in setting up nursing research.

The winner of the Best EAUN Nursing Research Project 2022 will be announced and will receive €2,500 to start his or her research project and an Award certificate in the Award Session on Monday, 4 July, 13.45 hrs

09:45 - 09:50
Introduction  
R. Pieters, Ghent (BE)

09:50 - 10:00
Nurse-supervised semi-automated telemedicine portal for follow-up for prostate cancer  
C. De Bie, Bergambacht (NL)

10:00 - 10:10
Does consultation with an advanced nurse practitioner in urology enable patients’ management of their condition?  
M. Dowling, Galway (IE)

10:10 - 10:20
Knowledge and Understanding of nurses on the care of patients post radical cystectomy and urinary diversion  
D. Leelamany, London (GB)

10:20 - 10:30
Impediments to compliance with Clean Intermittent Catheterization in a developing country  
N. Seenappa, Bangalore (IN)

10:30 - 10:40
Helping patients with chronic pelvic pain and non-relaxing pelvic floor: nurse-led transcutaneous sacral neuromodulation  
S. Terzoni, Milan (IT)

10:40 - 10:45
Conclusion  
R. Pieters, Ghent (BE)
# Challenges in paediatric urology
State-of-the-art Lecture 2

**Sunday 3 July**
**11:00 - 11:30**

**Location**
Yellow Area, Room E102

**Chair**
H. Cobussen-Boekhorst, Nijmegen (NL)

**Learning objectives**
The aim of this session is to describe the condition of bladder extrophy and epispadias in children. The nursing care and support for both the child and their family will be presented.

Managing bone health in men with prostate cancer: Room for improvement?
State-of-the-art Lecture 3

**Location**  
Yellow Area, Room E103

**Chair**  
A. Semedo, London (GB)

**Learning objectives**  
This session aims to enhance the awareness of the importance of measures to improve bone health in prostate cancer patients. Evidence and guidelines. Role of nurses/nurse practitioners can play in this.

The recognition of osteoporosis in men is low. The risk is the highest in men treated with ADT, because the testosterone levels will drop to 0. This should be recognised in time to prevent unwanted fractures and other negative side effects of osteoporosis.

</tbody>
</table>

Learning objectives
During this course you will discover the potential and limitations of investigation and treatment of children with incontinence. When do we really need urodynamics? What is the role of a voiding diary and when not to do urodynamics? When does urotherapy stops and CI(s)C starts? And what about pharmacologic treatment?

After this course incontinence and urodynamics will have lost their secrets also for the more experienced colleagues amongst us.

**Learning objectives**
During this session the update of the guideline on indwelling catheters by the EAUN will be presented. The latest literature has been studied. Undecided subjects have been discussed by an expert group of urology nurses throughout Europe. The results of the literature search and expert group opinion will be presented.

Prostate Cancer Special Interest Group: Does newer mean better?
Thematic Session 8

Location: Yellow Area, Room E102
Chair: B.R. Villumsen, Herning (DK)

Learning objectives
There are already effective treatments for localised prostate cancer in the form of surgery and radiotherapy but the world of prostate cancer is forever evolving with improvements to current practice happening all the time. There are newer machines capable of delivering radiotherapy with the MR-Linac being the new kid on the block, but does newer mean better? Is an increase in treatment options good for the patient, how do they cope with more choices and the fear of recurrence? This session will explore the use of the MR-Linac, personalised decision making and explore new strategies to help patients cope with the fear of recurrence.

14:45 - 14:47
Introduction
B.R. Villumsen, Herning (DK)

14:47 - 15:02
Does newer mean better in the new radiotherapy MR-linac?
F.R. Teunissen, Utrecht (NL)

15:02 - 15:32
Does newer mean better in current insights in psychological support for cancer patients?
A. King, London (GB)

15:32 - 15:42
Does newer mean better in evolving shared decision making from standard to personalised
C.N. Tillier, Amsterdam (NL)

15:42 - 15:45
Discussion and conclusion
B.R. Villumsen, Herning (DK)
From novice to expert urology nurse
Thematic Session 9

</tbody>
</table>

**Learning objectives**
What are necessary skills, education and knowledge of a urology nurse to grow from novice to expert or advanced nurse practitioner? And how is this related to CNE and EFUN? The examples of professional development of nurses and the explanation of the usefulness of the EFUN educational framework will be followed by a discussion on the skills and knowledge of urology nurses in their working environment.

Testosterone deficiency in adult and older men
State-of-the-art Lecture 7

Location: Yellow Area, Room E102
Chair: R. McConkey, Galway (IE)

Learning objectives
To learn to recognise testosterone deficiency in men and the long-term effects on quality of life, morbidity and mortality. Learn the different causes of testosterone deficiency in various age categories and after testicular surgery like orchidectomy. Know what treatment options are available and the consequences of the treatment options.

09:45 - 09:50
Introduction
R. McConkey, Galway (IE)

09:50 - 10:00
Physiology and pathophysiology of testosterone deficiency in adult onset hypogonadism
G. Corona, Bologna (IT)

10:00 - 10:10
Treatment options in testosterone deficiency and its impact on quality of life
J. Verkerk-Geelhoed, Nieuwegein (NL)

BABCON - Developing an integrated model of care for continence issues
State-of-the-art Lecture 8

**Monday 4 July**

**09:45 - 10:15**

**Location**  
Yellow Area, Room E103

**Chair**  
J. Ellis-Jones, Bristol (GB)

**Learning objectives**
This state-of-the-art lecture will present the latest update on a new model for practice, the Health Integration Teams model (HITs), which aims to integrate healthcare teams, and promote a more holistic approach to bladder and bowel confidence (BABCON). The BABCON HIT plans to achieve its aims through: enabling people to improve their symptoms through self-help, improving continence services including social care, community services, and inpatient hospital care, promoting continence education for the public and healthcare staff, undertaking high quality research and innovation to drive change, exploring the impact of environmental factors on people with bladder and bowel symptoms, and challenging beliefs about incontinence. A new BABCON (free) CONfidence app, which can offer self-help and signposting for adults living with continence issues, has recently been nominated and shortlisted for a national nursing journal award.

09:45 - 09:50

</tbody>
</table>

**Learning objectives**

This ESU course aims to teach about the diagnostics and different treatment modalities in localised and metastatic disease, including new options like Tyrosine Kinase Inhibitor and immunotherapy; Counselling of the patient during treatment by the nurse/nurse practitioner; Guiding the patient in recovery after treatment (positive health).

After the course the participant will know:
- the diagnostic options and treatment options for RCC
- how to counsel the patient during treatment in side effects of treatment
- how the multidisciplinary team is composed and how they work together.

Endourology Special Interest Group: Innovations in endourology (despite the pandemic!)

Thematic Session 10

Sunday 3 July
16:00 - 17:00

Location
Yellow Area, Room E102

Chairs
H. Omana, Abu Dhabi (AE)
M. Marchetti, London (GB)

Learning objectives
The aim of the session is to gain knowledge and objectively look at the advances within the field of endourology and robotics.

1. Advances in stone management: To provide an up-to-date approach in the management of known stone-forming patients, exploring the difference in management of overweight patients.

2. The pathway to advanced practice: Exploring the advancements in the role of a perioperative practitioner, development of new roles and skills, curriculum, the expanding role of the surgical team.

3. Innovative reconstructive robotic surgery: Are we there yet? A more in-depth look at the world of robotics and where it will be evolving in the next five years. Insight into the emergence of reconstructive capabilities in benign urology.

16:00 - 16:02

</tr>
</tbody>
</table>

**Learning objectives**

Participants of this session will learn how to have meaningful patient-physician relationships that may improve patient outcomes. They will learn more about patient perspectives in RC patient care, as well as valuable actions to improve the quality of life for RC patients. Finally, participants will learn about the role of the patient voice in patient advocacy and urology societies to be able to drive patient-focused improvements in care delivery and outcomes together.

Patient information
State-of-the-art Lecture 11

Location: Yellow Area, Room E103
Chair: F. Geese, Berne (CH)

Learning objectives
Androgen deprivation therapy (ADT) - also known as hormonal therapy - is prescribed to prostate cancer patients with localised disease prior to potentially curative treatments, such as radiotherapy, in order to increase treatment efficacy. It is also offered to those experiencing a rise in PSA after an initial curative treatment, those with recurrent disease, and those whose cancer has spread outside of the prostate at the time of diagnosis. These medications used control prostate cancer growth by shutting down testosterone production from the testes. However the depletion of testosterone has a number of side effects that can negatively impact the quality of life of both patients directly and their partners indirectly.

The ADT Educational Programme was developed to help prostate cancer patients manage the side effects of ADT through an interactive educational programme.

This state-of-the-art lecture will provide insight into the programme and its proven effectiveness, as well as how nurses can get involved in the rollout of the programme in Ireland and the UK and across Europe.

13:15 - 13:20

General Assembly
Specialty Session 4

Monday 4 July
14:00 - 14:45

Location: Yellow Area, Room E102
Chair: P. Allchorne, London (GB)

Learning objectives
The Annual General Assembly (AGM) of the European Association of Urology Nurses is a yearly gathering of the Membership and Board of the association. In the AGM, the Board reports on the activities and finances of the organisation and proposes changes in the bylaws or Board composition to the members. The members can also bring topics to the agenda of the AGM. The membership can approve or reject by voting as stated in the Bylaws. Voting is valid by simple majority and irrespective of the number of members attending.

The General Assembly (AGM) is accessible for all delegates - Voting only for European Full EAUN and European Online EAUN Members

Board:
P. Allchorne, London (GB), Chair
S. Vahr Lauridsen, Copenhagen (DK), Past Chair
J. Alcorn, Wakefield (GB)
F. Geese, Berne (CH)
T. Santos, Lisbon (PT)
C. Tillier, Amsterdam (NL)
J. Verkerk-Geelhoed, Nieuwegein (NL)

Agenda:
• Welcome by the chair
• Voting changes in the Board
• The report of the chair with the presentation of the achievements of 2021/2022
• Report ESUN & Guidelines activities
• Report Finances & Special Interest Groups & Scientific committee
• Open forum (for proposals from the members, cards will be available at the EAUN booth)

### Learning objectives

This session will update delegates on the ongoing progress that has been made in creating the EFUN. The collaboration between global urological nursing associations will be described, providing an understanding of the key benefits and challenges anticipated with the EFUN. Most importantly, delegates will join an interactive discussion on the plans thus far and will have the opportunity to continue to shape and guide the development of the structure and contents of the EFUN.
