ESU/EAUN Hands-on Training Course for nurses in Transperineal prostate biopsy

EAUN HOT 1

Friday 10 March
13:00 - 16:30

Location Blue Area, Room 3

Learning objectives

This highly practical course provides training and understanding on the use of the PrecisionPoint™ Transperineal Access System for local anaesthetic freehand transperineal biopsies in the prostate cancer diagnostic pathway. There will be case demonstrations and hands-on training and videos of both techniques with the use of MRI / ultrasound fusion being discussed.

This course is aimed at Nurses, involved in the diagnosis and treatment of prostate cancer and carrying out transperineal biopsies who are interested in changing the paradigm of outpatient prostate cancer diagnostics for trans rectal prostate biopsies to transperineal biopsies.

Limited places available. Only nurse participants who have registered for this course will be admitted. Registration fee is 34.00 euro. Register at: www.eaun23.org/registration Enquiries about registration: registrations@congressconsultants.com

13:00 - 13:10

Welcome and introduction of learning objectives

To be confirmed

13:10 - 13:40

Introduction and overview of LATP biopsies, TRExit

R. Popert, London (GB)

13:40 - 14:00

Consent

To be confirmed

14:00 - 14:30

Nurse led diagnostics: Early learning curve for TP biopsies and setting up a regional TP service

G. Zisengwe, London (GB)

14:30 - 14:45

TP biopsy video: Tips and tricks discussion

To be confirmed

14:45 - 16:20

Hands-on Training

16:20 - 16:30

Closing remarks and take-home messages

Increasing urological care in an aging population

Plenary Session 1

Saturday 11 March
09:00 - 10:15

Location Yellow Area, Amber 7

Chair P. Allchorne, London (GB)

Learning objectives

To learn about the influence of an aging population on the different urological diseases, like LUTS, uro-oncological. What will the future bring us with decreasing nursing and medical staff with an increasing group of elderly patients? How can we prepare to the challenge of coping with staff shortage?

09:00 - 09:05

Welcome to the 23rd International EAUN Meeting

P. Allchorne, London (GB)

09:05 - 09:10

Welcome to Milan

C.R. Chapple, Sheffield (GB)

09:10 - 09:15

Welcome by the Italian Urology Nurses Society (AIURO)

S. Terzoni, Milan (IT)

09:15 - 09:40

Influence of an aging population on the urological care

C.R. Chapple, Sheffield (GB)

09:40 - 10:10

How to prepare to an increase of urological elderly patients

K. Ancog, Sydney (AU)

10:10 - 10:15

Discussion and closing remarks

P. Allchorne, London (GB)

The current state of intra/inter-professional collaboration in urological care

Thematic Session 1

Saturday 11 March
10:30 - 11:30

Location Yellow Area, Amber 7

Chair C.N. Tillier, Amsterdam (NL)

Learning objectives

The role of the urological nurse in Europe is changing since few decennia. From basic nursing care to specialized (medical) care, the nurse's prerogatives, tasks evolved and are still evolving. A new trend seems to appear with the active implication of the general practitioner in follow up of urological patients. As a result of these developments, the role of the urologist is also changing. Has the urologist become just an "operating machine"? How does the urologist deal with these developments? What are the arguments of the specialized nurse in terms of the quality of care provided?

10:30 - 10:35

Introduction

C.N. Tillier, Amsterdam (NL)

10:35 - 10:50

The urologist's perspective from France

M. Rouprêt, Paris (FR)

10:50 - 11:05

The urologist's perspective from the UK

J. Green, London (GB)

11:05 - 11:15

The nurse's perspective

S.C. Hillery, York (GB)

11:15 - 11:25

Follow up of prostate cancer in secondary and primary healthcare

B. Wollersheim, Amsterdam (NL)

11:25 - 11:30

Discussion and closing remarks

C.N. Tillier, Amsterdam (NL)

Supportive care for patients with a urostomy

Thematic Session 2

Saturday 11 March
10:30 - 11:30

Location Yellow Area, Amber 5

Chair K. Chatterton, London (GB)

Learning objectives

The aim of this session is to describe the latest literature and the results of the expert group opinion about ostomy care. The ostomy nursing care and support for both the patient and their family will be presented, with a focus on the importance to understand the patients' experience. We will also be exploring the support of the psycho-oncologist during the choice of urinary diversion and post-discharge management.

10:30 - 10:35

Introduction

K. Chatterton, London (GB)

10:35 - 10:50

The impact of the ostomy nurse on patient's life with a urostomy

D. Maculotti, Brescia (IT)

10:50 - 11:05

Self-care in ostomy patients - the experience of having a urostomy

G. Villa, Milan (IT)

11:05 - 11:20

The role of the psycho-oncologist from the diversion's choice to ostomy daily management

A. King, London (GB)

11:20 - 11:30

Discussion and closing remarks

K. Chatterton, London (GB)

The development of nurse led virtual clinics for prostate cancer

Thematic Session 3

Saturday 11 March
11:45 - 12:45

Location Yellow Area, Amber 7

Chairs L. Casey, Dublin (IE)
R. McConkey, Galway (IE)

Learning objectives

The global pandemic changed the face of healthcare delivery forever, fundamentally changing employer views on where and how people work best. Across the healthcare system, innovative ways of delivering safe and effective healthcare quickly emerged. The idea of virtual consultation is not new, but the response to the COVID-19 pandemic has presented a unique opportunity to embrace a different way of thinking, framed by new and changing risks and priorities.

During this session we will hear and learn about the development and delivery of virtual clinics for patients that have been referred to a rapid access prostate clinics, patients who are awaiting prostate cancer surgery and finally on a virtual clinic for patients receiving androgen deprivation therapy.

11:45 - 11:50

Introduction

L. Casey, Dublin (IE)

11:50 - 12:05

Delivering virtual Rapid Access Prostate Clinics (RAPC)

M. Cremin, Dublin (IE)

12:05 - 12:20

Delivering virtual pre-surgery clinics

J.E. Kinsella, London (GB)

12:20 - 12:35

Delivering virtual support and the ADT programme

R. Dalton, Galway (IE)

12:35 - 12:45

Discussion and closing remarks

R. McConkey, Galway (IE)

AIURO keynote lecture: Italian research on measurable outcomes of the nurse-patient therapeutic relationship

State-of-the-art Lecture 1

Saturday 11 March
11:45 - 12:15

Location Yellow Area, Amber 5

Chair R. Pieters, Ghent (BE)

Learning objectives

After attending this session, the delegates will be able to describe the measurable health outcomes of the therapeutic relationship between nurses and patients in urological rehabilitation, as well as methods and tools to assess such outcomes.

11:45 - 11:50

Introduction

R. Pieters, Ghent (BE)

11:50 - 12:10

The findings of research on measurable outcomes of the nurse-patient therapeutic relationship on the quality of life after rehabilitation

S. Terzoni, Milan (IT)

12:10 - 12:15

Discussion and closing remarks

R. Pieters, Ghent (BE)

Guidelines for care of indwelling catheters in adults

State-of-the-art Lecture 2

Saturday 11 March
12:30 - 13:00

Location Yellow Area, Amber 5

Chair T. Santos, Lisbon (PT)

Learning objectives

After this session the participants will know indications and contraindications of insertion of an indwelling catheter. They will be able to reflect on pros and cons for the use of indwelling catheters based on the risk of complications. And they will be updated on the patient perspective, how does an indwelling catheter impact your everyday life.

12:30 - 12:32

Introduction

T. Santos, Lisbon (PT)

12:32 - 12:47

Guidelines for indwelling catheterisation in adults and the patient perspective

V. Geng, Lobbach (DE)

12:47 - 13:00

Discussion and closing remarks

V. Geng, Lobbach (DE)

T. Santos, Lisbon (PT)

Professional collaboration along the bladder cancer care pathway

Thematic Session 4

Saturday 11 March
14:30 - 15:30

Location Yellow Area, Amber 7

Chairs R. McConkey, Galway (IE)
B. Thoft Jensen, Aarhus (DK)

Learning objectives

Interprofessional collaboration is characterised by strong communication and working on eye level with different healthcare professionals to offer good quality care when nursing for patients in complex care situations. Patients diagnosed with bladder cancer find themselves often in a complex care situation due to its complex treatment plan and multimorbidity. This thematic session aims for to bring multiple perspectives of healthcare professionals together which combine to form one whole interprofessional perspective along the bladder cancer care pathway. Participants learn about the different tasks and responsibilities of healthcare professionals to provide collaboration that positively impacts patients satisfaction.

14:30 - 14:35

Introduction

R. McConkey, Galway (IE)

14:35 - 14:50

Epidemiology, treatment options, and the shared decision-making process

D. Leelamany, Hornchurch (GB)

14:50 - 15:05

Pre- and post-operative nursing care regarding urinary diversions

G. Villa, Milan (IT)

15:05 - 15:20

The physiotherapist's role regarding preparation and rehabilitation

M. Rombouts, Nijmegen (NL)

15:20 - 15:30

Discussion and closing remarks

B. Thoft Jensen, Aarhus (DK)

Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

Poster Session 1

Saturday 11 March 14:30 - 16:15	Location	Yellow Area, Amber 5
	Chairs	T. Santos, Lisbon (PT) K. Chatterton, London (GB)
	Judges	S.C. Hillery, York (GB) J. Alcorn, Wakefield (GB) F. Geese, Berne (CH)
	Learning objectives Poster viewing of 30 minutes. Short introduction of 1 minute by the chair of the session. Presentations will be pre-recorded and discussion will take place on stage. Standard presentations are 6 minutes in length, followed by 2 minutes for discussion. Closing remarks of 2 minutes by the chair of the session.	
14:30 - 15:00	Poster viewing

Discussion and closing remarks
M. Boarin, Milan (IT)

Endourology Special Interest Group: Expanding the traditional nursing role

Thematic Session 5

Saturday 11 March
16:30 - 17:30

Location Yellow Area, Amber 7

Chair A. Mohammed, London (GB)

Learning objectives

The aim of the session is to gain knowledge and objectively look at the advances within the field of endo-urology and robotics. Following last year's program, we are now embracing the changing role of the urology nurse. After Covid we have seen a rise in nurse's wishing to expand and improve their skills and knowledge which is leading to a modernization of traditional roles. Therefore, we have chosen nurses who have embraced their chosen roles and increased their scope of practice. We will appraise existing evidence on the RNFA role within the perioperative setting as well as explore the comprehensive role of an advance perioperative urology nurse. We shall also explore the challenges and achievements of building a successful nurse led stone clinic.

16:30 - 16:35

Introduction

A. Mohammed, London (GB)

16:35 - 16:45

Role of the registered nurse first assistant within the perioperative setting

R. Pika Bissala, Dublin (IE)

16:45 - 16:55

Are dual roles practical and will they benefit the patient?

M. Marchetti, London (GB)

16:55 - 17:05

Implementation of a successful stone clinic: Modernising the role of the nurse

L. Logrado, London (GB)

17:05 - 17:25

Panel discussion

Discussants

L. Logrado, London (GB)

M. Marchetti, London (GB)

A. Mohammed, London (GB)

R. Pika Bissala, Dublin (IE)

17:25 - 17:30

Closing remarks

A. Mohammed, London (GB)

Continenace Special Interest Group: Troubleshooting in continence care

Thematic Session 6

Saturday 11 March
16:30 - 17:30

Location Yellow Area, Amber 5

Chair S. Terzoni, Milan (IT)

Learning objectives

After attending this session, the delegates will be able to describe tips and tricks to manage unusual or complicated situations in continence care from nurses' point of view.

16:30 - 16:35

Introduction

S. Terzoni, Milan (IT)

16:35 - 16:45

Helping adults with voiding problems: The advantages of using biofeedback

G. Mörzinger, Linz (AT)

16:45 - 16:55

Products and criteria to face difficult situations in stoma therapy

V. Lejay, Paris (FR)

16:55 - 17:05

Gender care, coping and quality of life in patients with urinary diversion

G. Villa, Milan (IT)

17:05 - 17:15

Difficult catheterisation: Unusual and problematic cases

E. Wallace, Dublin (IE)

17:15 - 17:30

Discussion and closing remarks

S. Terzoni, Milan (IT)

Whirlwind review of Urology pathways

Plenary Session 2

Sunday 12 March
08:30 - 09:30

Location Yellow Area, Amber 7

Chair L. Drudge-Coates, London (GB)

Learning objectives

The European Pathway Association defines a care pathway as a complex intervention for the mutual decision-making and organisation of care processes for a well-defined group of patients during a well-defined period. Pathways ensure safe and equal care that are guided by International guidelines. In this session you will get an overview of care pathways for the main Urological cancers; Bladder, Renal, prostate, Penile and testicular. The aim is to describe how these pathways are utilized in practice.

08:30 - 08:35

Introduction

L. Drudge-Coates, London (GB)

08:35 - 08:45

Haematuria pathway

E. Rogers, Galway (IE)

08:45 - 08:55

Prostate cancer pathway

P. Albin, Beinwil am see (CH)

08:55 - 09:10

Testicular cancer pathway

A.Z. Thomas, Dublin (IE)

09:10 - 09:20

Penile cancer pathway

A. Salonia, Milan (IT)

09:20 - 09:30

Discussion and closing remarks

L. Drudge-Coates, London (GB)

Bladder Cancer Special Interest Group: Frailty in bladder cancer - an underestimated marker in clinical practice?

Thematic Session 7

Sunday 12 March
09:45 - 10:45

Location Yellow Area, Amber 7

Chair B. Thoft Jensen, Aarhus (DK)

Learning objectives

The aim is to identify the best tool for measuring frailty in BC patients and provide consensus for recommendations for assessment and managing frailty in BC pathways. The learning objectives are to inform the urological nurses about the hidden risk factor frailty, and to inform the delegates of the current tools to assess frailty, the evidence and ability for use in clinical practice.

09:45 - 09:50

Introduction

B. Thoft Jensen, Aarhus (DK)

09:50 - 10:00

What is frailty and why is it a hidden risk factor in BC?

MG Gregersen, Aarhus (DK)

10:00 - 10:10

How can we easily assess frailty, what are the current tools and how can they be used in clinical practice

K. Donlon, Roscommon (IE)

10:10 - 10:20

How to counteract frailty? What is the current evidence?

K. Skovhus Prior, Randers (DK)

10:20 - 10:40

What took us so long? Discussion with the audience and suggestions for recommendations and future guideline

Discussants

MG Gregersen, Aarhus (DK)

K. Donlon, Roscommon (IE)

K. Skovhus Prior, Randers (DK)

10:40 - 10:45

Closing remarks

B. Thoft Jensen, Aarhus (DK)

Educational Framework for Urological Nursing (EFUN) – Where are we and where are we going?

Thematic Session 8

Sunday 12 March
09:45 - 10:45

Location Yellow Area, Amber 5

Chairs J.T. Marley, Newtownabbey (GB)
J. Taylor, Salford (GB)

Learning objectives

Through attending this session delegates will better understand the developments in EFUN that have occurred since the EAUN congress held in Amsterdam in 2022. Delegates will have the opportunity to consider the draft learning outcomes that have been devised and presented to EAUN, BAUN and ANZUNS in December. The outline feedback from the three international societies will be briefly shared and delegates will be engaged with in discussion regarding the final steps that are planned prior to the formal publishing of EFUN.

09:45 - 09:50

Introduction

J.T. Marley, Newtownabbey (GB)

09:50 - 10:00

EFUN update

J. Taylor, Salford (GB)

10:00 - 10:20

EFUN learning outcomes

P. Allchorne, London (GB)
S.C. Hillery, York (GB)
K. Ancog, Sydney (AU)

10:20 - 10:25

Key questions for the future of EFUN

J. Taylor, Salford (GB)

10:25 - 10:45

Discussion and closing remarks

J.T. Marley, Newtownabbey (GB)

Understanding how extended roles in urology nursing are supported by current European legislation

State-of-the-art Lecture 4

Sunday 12 March
11:00 - 11:30

Location Yellow Area, Amber 7

Chair P. Allchorne, London (GB)

Learning objectives

The objectives of this session are to discuss current European legislation supporting extended nursing roles, to educate the audience on which countries support non-medical prescribing and the impact of supporting of non-medical prescribing roles in urology nursing as well as to highlight potential gaps in legislation that may lead to be addressed.

11:00 - 11:05

Introduction

P. Allchorne, London (GB)

11:05 - 11:25

Understanding how extended roles in urology nursing are supported by current European legislation

J. Wood, London (GB)

11:25 - 11:30

Discussion and closing remarks

P. Allchorne, London (GB)

The complex dynamics between nurses, patients and carers

State-of-the-art Lecture 5

Sunday 12 March
11:00 - 11:30

Location Yellow Area, Amber 5

Chair C.N. Tillier, Amsterdam (NL)

Learning objectives

This session aims to look at some of the complex dynamics between nurses, patients and carers. It will investigate how we can involve carers collaboratively in treatment and recovery and to examine complex interactions with 'difficult' carers / families. We will also explore what could holistic supportive care for carers look like, and discuss what happens when staff is the only social support for patients and how to hold the boundaries and dilemmas of that.

11:00 - 11:05

Introduction

C.N. Tillier, Amsterdam (NL)

11:05 - 11:25

The complex dynamics between nurses, patients and carers

A. King, London (GB)

11:25 - 11:30

Discussion and closing remarks

C.N. Tillier, Amsterdam (NL)

Management of minor complications in percutaneous nephrostomy

State-of-the-art Lecture 6

Sunday 12 March
11:45 - 12:15

Location Yellow Area, Amber 7

Chair R. Pieters, Ghent (BE)

Learning objectives

Percutaneous nephrostomy is indicated for temporary and at times long term drainage of an obstructed renal collecting system. Major complications are haemorrhage, sepsis, pleural injury. Minor complications such as urinary tract infection, catheter dislodgement, catheter obstruction, urinary leakage, and inflammation of the skin at the site of insertion of the percutaneous catheter can be diagnosed and managed by the nurse practitioner or by the urology nurse. In this session tips and tricks in management of minor complications in percutaneous nephrostomy will be provided.

11:45 - 11:50

Introduction

R. Pieters, Ghent (BE)

11:50 - 12:10

Management of minor complications in percutaneous nephrostomy: Tips and tricks

M. Jones, Canterbury (GB)

12:10 - 12:15

Discussion and closing remarks

R. Pieters, Ghent (BE)

Poster presentations on research studies, problem-solving efforts and innovative programmes in urology

Poster Session 2

Sunday 12 March
11:45 - 13:40

Location Yellow Area, Amber 5

Chairs A. Semedo, London (GB)
A. Mohammed, London (GB)

Judges J. Alcorn, Wakefield (GB)
F. Geese, Berne (CH)
S.C. Hillery, York (GB)

Learning objectives

Poster viewing of 30 minutes. Short introduction of 1 minute by the chair of the session. Presentations will be pre-recorded and discussion will take place on stage. Standard presentations are 6 minutes in length, followed by 2 minutes for discussion. Closing remarks of 2 minutes by the chair of the session.

11:45 - 12:15

The follow-up of stone management

ESU Course 1

Sunday 12 March
12:30 - 14:30

Location Yellow Area, Amber 7

Chair B. Somani, Southampton (GB)

Learning objectives

This ESU course aims to help learn about the follow-up of patients with urolithiasis which has recently been added to the EAU guidelines.

Counselling of patients, metabolic screening and imaging modality during follow-up by the team and guiding patients with informed decision making. The role of virtual follow-up, patient acceptability and the role of multidisciplinary team for best outcomes during stone management.

After the course the participants will know about the role specialist nurses and clinical teams can play in the follow-up and how this can be adapted to most centres.

12:30 - 12:35

Introduction

B. Somani, Southampton (GB)

12:35 - 12:50

Do we really need a follow-up

B. Somani, Southampton (GB)

16:00 - 16:15

Discussion

P.H. Reynolds, Manchester (GB)

Conditions of the penis

Thematic Session 9

Sunday 12 March
15:00 - 16:00

Location Yellow Area, Amber 5

Chair H. Reinders-Huisman, Groningen (NL)

Learning objectives

Penile disorders comprise several conditions which all require adequate diagnostics and interventions. This session will start with a presentation about anomalies of the penis. After that, the focus is shifted towards a specific treatment of erectile dysfunction, when the impact of a penile prosthesis on sexuality will be addressed. The final topic of this session is priapism a condition which requires immediate treatment.

15:00 - 15:05

Introduction

H. Reinders-Huisman, Groningen (NL)

15:05 - 15:20

Anomalies of the penis

D.J. Ralph, London (GB)

15:20 - 15:35

The impact of a penile prosthesis on sexuality

M. Lenaers, Diepenbeek (BE)

15:35 - 15:50

Priapism

L. Boeri, Milan (IT)

15:50 - 16:00

Discussion and closing remarks

H. Reinders-Huisman, Groningen (NL)

Video session

Video session

Sunday 12 March
16:15 - 16:45

Location Yellow Area, Amber 5

Chair T. Santos, Lisbon (PT)

Learning objectives

Urology nursing is very dynamic, propelled forward by emerging technology, evidence-based practice and clinical demands. However, it is a mistake to assume that urology nursing practice is of the same level, or offering the same services, evenly throughout the EU. In fact, what is taken for granted as a recognised nurse-led practice in one country, is totally the opposite in another EU state. With this in mind, the video session's aim is to showcase such practices by nurses to other fellow urology nurses, what has been achieved and fine-tuned in specific areas. It will also be an occasion to ask our fellow urology nurses on how they overcame situations that may still occur in other emerging clinical nursing practices.

16:15 - 16:17

Introduction

V01

A fool-proof gauze management: A reliable way of sponge count

C-Y. Chen, Kaohsiung City (TW)

V02

Easier and safer way for upper ureteral tract instillation

C.I. Liu, Kaohsiung (TW)

V03

Male to female sex reassignment surgery: A nurse perspective

M. Dimitrijevic, Trieste (IT)

16:44 - 16:49

Conclusion

Testosterone deficiency in adult and older men

State-of-the-art Lecture 7

Sunday 12 March
16:30 - 17:00

Location Yellow Area, Amber 7

Chair R. McConkey, Galway (IE)

Learning objectives

To learn to recognise testosterone deficiency in men and the long-term effects on quality of life, morbidity and mortality. Learn the different causes of testosterone deficiency in various age categories and after testicular surgery like orchidectomy. Know what treatment options are and the consequences of the treatment options.

16:30 - 16:35

Introduction

R. McConkey, Galway (IE)

16:35 - 16:55

Physiology, pathophysiology and treatment of testosterone deficiency in adult onset hypogonadism

J. Verkerk-Geelhoed, Nieuwegein (NL)

16:55 - 17:00

Discussion and closing remarks

R. McConkey, Galway (IE)

ESU/EAUN Hands-on Training Course for nurses in Flexible cystoscopy

EAUN HOT 2

Monday 13 March
08:00 - 11:30

Location

Blue Area, Room 3

Learning objectives

A flexible cystoscopy course aimed at urological nurses, introducing a comprehensive foundation of knowledge required to complete training. Including the opportunity for some practical training with flexible cystoscopes and allowing participants to start training locally, guided by appropriately trained urologists skilled in cystoscopy.

Limited places available. Only nurse participants who have registered for this course will be admitted. Registration fee is 34.00euro.

Register at: www.eaun23.org/registration

Enquiries about registration: registrations@congressconsultants.com

08:00 - 08:05

Welcome and introduction

K. Chatterton, London (GB)

08:05 - 08:15

Enhanced skills for nurses. Why do it?

P. Allchorne, London (GB)

08:15 - 08:30

Anatomy and physiology of the bladder

V. Kumarasegaram, Aarhus N (DK)

08:30 - 08:45

Anatomy and physiology of the bladder

T. Dreyer, Aarhus (DK)

08:45 - 09:00

Modular learning and gaining competencies

R. McConkey, Galway (IE)

09:00 - 09:15

Patient consent

M. Fagerberg, Eksjö (SE)

09:15 - 09:30

Introducing the flexible cystoscope

09:30 - 09:45

Break

09:45 - 11:15

Hands-on training - Using scopes with models

L.B. Dragoş, Cambridge (GB)

11:15 - 11:30

Questions and feedback

Enhancing sexual function in men and women

Plenary Session 3

Monday 13 March 08:30 - 09:30	Location	Yellow Area, Amber 7
	Chair	L. Drudge-Coates, London (GB)

08:35 - 08:50	Sexual function in females with physical impairment	R. Martin, London (GB)
08:50 - 09:05	Sexual function in males with physical impairment	L. Boeri, Milan (IT)
09:05 - 09:25	Chemsex: What urology nurses and nurse practitioners need to know	J. Krans, Rotterdam (NL)
09:25 - 09:30	Discussion and closing remarks	L. Drudge-Coates, London (GB)

Treatment of Peyronie's disease in the acute phase

State-of-the-art Lecture 8

Monday 13 March
09:45 - 10:15

Location Yellow Area, Amber 7

Chair M. Boarin, Milan (IT)

Learning objectives

The aim of this session is to describe the condition of La Peyronie disease, with a focus on sexual male health and quality of life impact. The results of the most recent studies and innovative treatments will be presented.

09:45 - 09:50

Introduction

M. Boarin, Milan (IT)

09:50 - 10:10

Drug treatment in the acute phase

J. Verkerk-Geelhoed, Nieuwegein (NL)

10:10 - 10:15

Discussion and closing remarks

M. Boarin, Milan (IT)

BABCON - Developing an integrated model of care for continence issues

State-of-the-art Lecture 9

Monday 13 March
09:45 - 10:15

Location Yellow Area, Amber 5

Chair J. Ellis-Jones, Bristol (GB)

Learning objectives

This state-of-the-art lecture will present the latest update on a new model for practice, the Health Integration Teams model (HITs), which aims to integrate healthcare teams, and promote a more holistic approach to bladder and bowel confidence (BABCON). The BABCON HIT plans to achieve its aims through: enabling people to improve their symptoms through self-help, improving continence services including social care, community services, and inpatient hospital care, promoting continence education for the public and healthcare staff, undertaking high quality research and innovation to drive change, exploring the impact of environmental factors on people with bladder and bowel symptoms, and challenging beliefs about incontinence. A new BABCON (free) CONfidence app, which can offer self-help and signposting for adults living with continence issues, has recently been nominated and shortlisted for a national nursing journal award.

09:45 - 09:50

Introduction

J. Ellis-Jones, Bristol (GB)

09:50 - 10:10

Health Integration Teams (HITs): A new model to promote bladder and bowel confidence (BABCON HIT)

N. Cotterill, Bristol (GB)

How to prevent UTI in patients with neuourological problems

ESU Course 2

Monday 13 March
10:30 - 12:30

Location

Yellow Area, Amber 7

Chair

B.Y. Padilla Fernandez, San Cristóbal De La Laguna (ES)

Learning objectives

During this course you will review the different definitions of urinary tract infections and see the potential investigations to conduct in case of recurrent UTIs in neuro-urological patients.

We will also deal with the different therapeutic and preventive strategy in case of UTIs in neuro-urological patients.

10:30 - 10:35

Introduction

B.Y. Padilla Fernandez, San Cristóbal De La Laguna (ES)

10:35 - 10:50

Epidemiology: How frequent are they?

B.Y. Padilla Fernandez, San Cristóbal De La Laguna (ES)

10:50 - 11:05

Definitions and diagnostic tools: Symptoms, values of urinalysis and urine culture

S. Musco, Florence (IT)

11:05 - 11:20

Recurrent UTIs: Risk factors and investigations

B.Y. Padilla Fernandez, San Cristóbal De La Laguna (ES)
S. Musco, Florence (IT)

11:20 - 11:35

Break

11:35 - 11:50

Management of recurrent UTIs: • Catheterisations: The ideal solution to prevent recurrent UTIs? Barriers and patient triage • Antibiotic prophylaxis • Cranberry, D-Mannose • Vaccines

J. Taylor, Salford (GB)

11:50 - 12:05

Case discussion: Recurrent UTIs in MS patients

12:05 - 12:30

Take home messages + Q&A

12:30 - 12:30

Close

Adapting follow-up to kidney cancer patients' needs

Thematic Session 11 (Panel discussion)

Monday 13 March 10:30 - 11:30	Location	Yellow Area, Amber 5
	Chairs	J. Alcorn, Wakefield (GB) A. Semedo, London (GB)
10:30 - 10:35	Intoduction J. Alcorn, Wakefield (GB)	
10:35 - 10:45	Guidelines for kidney cancer follow-up C.N. Tillier, Amsterdam (NL)	
10:45 - 11:25	Panel discussion Discussants	A. Bex, London (GB) M. Marchetti, London (GB) C.N. Tillier, Amsterdam (NL) M. Stopher, Essex (GB)

Interactive session on the side effects of the diagnostics and treatment of localised prostate cancer and non-muscle-invasive bladder cancer

Thematic Session 12

Monday 13 March
11:45 - 12:45

Location Yellow Area, Amber 5

Chair F. Geese, Berne (CH)

Learning objectives

Prostate and bladder cancer are common malignancies of the genitourinary system. In this session, the delegates will get an overview of the common side effects of the diagnostics and treatments of both localised prostate cancer and of non-muscle invasive bladder cancer. The psychosocial impact on a patient's quality of life will be outlined. Following this, two interactive case studies will be presented where the delegates will be encouraged and have the opportunity to participate in the discussion.

11:45 - 11:50

Introduction

F. Geese, Berne (CH)

11:50 - 12:00

Side effects of the diagnosis and treatment of localised PCa

H. Reinders-Huisman, Groningen (NL)

12:00 - 12:10

Side effects of the diagnostics and treatment of NMIBC

R. McConkey, Galway (IE)

12:10 - 12:20

Psycho-oncological impact and quality of life

F. Geese, Berne (CH)

12:20 - 12:30

Case discussion Case discussion on PCa

H. Reinders-Huisman, Groningen (NL)

12:30 - 12:40

Case discussion Case discussion on NMIBC

R. McConkey, Galway (IE)

12:40 - 12:45

Discussion and closing remarks

F. Geese, Berne (CH)

Fertility in men and treatment of sub-fertility

State-of-the-art 10

Monday 13 March
13:00 - 13:30

Location Yellow Area, Amber 7

Chair H. Reinders-Huisman, Groningen (NL)

Learning objectives

The fertility of men has declined over the last decades. Is it worrying, or are they still fertile enough? This question is raised in different circumstances and in different areas. In this session we will discuss the fertility of men, how this is developing in the last few decades. We also will learn about treatment options of subfertility in men.

13:00 - 13:05

Introduction

H. Reinders-Huisman, Groningen (NL)

13:05 - 13:25

(Decline) of fertility in men and treatment of sub-fertility

M. Dinkelman-Smit, Rotterdam (NL)

13:25 - 13:30

Discussion and closing remarks

H. Reinders-Huisman, Groningen (NL)

Award session

Award session

Monday 13 March
13:45 - 14:00

Location Yellow Area, Amber 7

Chair P. Allchorne, London (GB)

Learning objectives

In this session the following prizes will be handed out:

- First Prize for the Best Practice-development Poster Presentation 500 EUR
- First Prize for the Best Scientific Poster Presentation 500 EUR
- Second Prize for the Best Practice-development Poster Presentation 250 EUR
- Second Prize for the Best Scientific Poster Presentation 250 EUR
- Prize for the Best EAUN Nursing Research Project 2500 EUR

General assembly

General assembly

Monday 13 March
14:00 - 14:45

Location Yellow Area, Amber 7

Chair P. Allchorne, London (GB)

Learning objectives

The Annual General Assembly (AGM) of the European Association of Urology Nurses is a yearly gathering of the Membership and Board of the association. In the AGM, the Board reports on the activities and finances of the organisation and proposes changes in the bylaws or Board composition to the members. The members can also bring topics to the agenda of the AGM. The membership can approve or reject by voting as stated in the Bylaws. Voting is valid by simple majority and irrespective of the number of members attending.

The General Assembly (AGM) is accessible for all delegates - Voting only for European Full EAUN and European Online EAUN Members

Board:

P. Allchorne, London (GB), Chair
C. Tillier, Amsterdam (NL), Chair ElectA
J. Alcorn, Wakefield (GB)
M. Boarin, Milan (IT)
F. Geese, Berne (CH)
R. McConkey, Galway (IE)
T. Santos, Lisbon (PT)
J. Verkerk-Geelhoed, Nieuwegein (NL)

Agenda:

1. Welcome by the chair
2. [Minutes](#) of the AGM 2022 (incl. vote)
3. Report by the Board Members:

Accreditation & Endorsement
Guidelines Scientific Committee & ESNO
Social Media & Education
Special Interest Groups & ESUN course
Membership development & Finances

4. Changes in the Board & Scientific Committee (incl. vote)
5. Open forum (for proposals from the members, cards will be available at the EAUN booth)
