Appendix 2

Description of Hospital / Institution

The Polyclinique des Alpes du Sud is a small institution nested in the alps, 2 hours drive from Marseille, south of France.

We have a capacity of 25 beds for surgery, 25 beds for medical care and 50 beds for ambulatory surgery.

We have an total activity of more than 4000 stays/year and 7000 ambulatory surgeries. Because of the increase of the activity we even had to build a new operating room.

We have different specialties such as urology, orthopaedics, ophthalmology, oto-rhino-laryngology and vascular surgery. We also refer patients to other specialties in consultation (cardiology, neurology...)

The population we treat is large and because of our geographic situation sometimes people have to drive hours to come to the polyclinique.

In the urology department we treat almost 1000 persons per year in surgery and 1200 persons in the outpatient department. We offer a multipurpose urology, including cancerology, prostate disease, continence treatment, stone disease... Our surgeons were amongst the first in France to use the laser technology, not only to treat stone disease but also to treat prostate adenoma.

In the outpatient department we see patients for prostate biopsy, urodynamics, cystoscopy and bladder instillations.

Also, a few nurses are trained to propose a cancer patient support program to help patients understand their disease and reduce anxiety.

The Polyclinique des Alpes du Sud is a host institution for training nurses, training operating room nurses and training caregivers.

We are an energetic small institute, in a really beautiful environment. We really are looking forward to learn and share our practice and knowledge.
