

EAUNwebinar

## Assessment and nursing management of refractory chronic pelvic pain

14 September 2022

19:00 – 20:15 CEST (18:00 – 19:15 GMT)

### Learning objectives

After this webinar you will know:

- The methods of evidence-based patient assessment from a nurses' point of view
- The strategies that can be used by nurses in clinical practice to create a solid therapeutic relationship
- An evidence-based set of criteria for deciding whether transcutaneous neuromodulation of sacral roots is appropriate
- The practical criteria for applying transcutaneous neuromodulation of sacral roots
