

EAUNwebinar: Genomics and prostate cancer

17 September 2025

19:00 – 20:00 CEST (18:00 – 19:00 GMT)

Aim: To educate nurses on genomics and how they can be used in managing prostate cancer

Learning objectives

After this webinar you will have:

- An understanding of genomics in health care
- An understanding of how genomics can inform prostate cancer treatment
- An understanding of current treatments for prostate cancer, their actions and their side effect considerations
- An understanding of the role of the nurse in supporting the prostate cancer patient considering genomic testing and treatment
- An understanding of the lived experience of patients who have had genomic testing

Programme

Moderator: N. Roberts, Brisbane (AU)

19.00 – 19.05 Introduction

N. Roberts, Brisbane (AU)

19.05 – 19.20 Genomics in prostate cancer at primary diagnosis

P.J. Van Leeuwen, Amsterdam (NL)

19.20 – 19.35 Genomics in prostate cancer - considerations for nurses

E. Bancroft, London (GB)

19.35 – 19.50 The experience of having genomic testing and treatment: A patient perspective

E. Briers, Hasselt (BE)

19.50 – 20.00 Discussion and conclusion
