

EAUNwebinar

## Follow-up care after radical cystectomy in primary care

May 14, 2025

19:00 – 20:00 CEST (18:00 – 19:00 GMT)

This webinar aims to provide a comprehensive understanding of follow-up care after radical cystectomy. Experts will discuss urine markers for survival prediction and timely oncological referrals, strategies for managing late post-surgical complications, and the development of dedicated clinics to support individualised patient needs. The session will also address sexual health, stoma care, dietary considerations, mental health, and psychological support.

### Learning objectives

In this webinar, participants will:

- Improve their knowledge and understanding of follow up care following radical cystectomy.
- Gain insights into how urine biomarkers can predict survival outcomes and support proactive referrals for oncological treatment.
- Learn how to effectively monitor and manage patients after radical cystectomy, including recognising early signs of complications and coordinating multidisciplinary care.
- Understand the impact of radical cystectomy on sexual health and learn strategies to provide holistic patient-centred support.

### Programme

Moderators: B.T. Jensen, Aarhus (DK)  
K. Chatterton, London (GB)

**19:00 – 19:05 Introduction**

**19:05 – 19:20 Urine marker -prediction for survival and proactive referral to oncological treatment**

N. Demuth Fryd, Aarhus (DK)

**19:20 – 19:35 Late events after RC - a new clinic to support and manage late events (individual issues)**

T. Juul, Aarhus (DK)

**19:35 – 19:50 Navigating sexual consequences and recovery after a radical cystectomy**

R. Martin, London (GB)

**19:50 – 20:00 Discussion and conclusion**

B.T. Jensen, Aarhus (DK)
