

EAUNwebinar

Managing overactive bladder syndrome: The role of nurses inside a multidisciplinary team

11 September, 2024

19:00 – 20:05 CEST (18:00 – 19:05 GMT)

Learning objectives

After this webinar, participants will:

- Be able to describe up-to-date criteria and methods for treating overactive bladder with therapies, medications and neuromodulation (both implanted and external) with a focus on the nurses' role inside a multidisciplinary team
- Be able to describe the interaction between the healthcare staff and patients in shared decision-making
